Acknowledgement of assistance

All manuscripts utilizing the data in this codebook and Cd-rom should identify the original collectors of the data. All users are urged to include some adaptation of the following statement in their publication, with the parentheses indicating items to be inserted or deleted as appropriate:

The data [and tabulations] utilized in this [publication] were originally collected for the Dutch Parliamentary Election Studies 2002 and 2003 by Galen A. Irwin, Joop J.M. van Holsteyn and Josje M. den Ridder on behalf of the Foundation for Electoral Research in the Netherlands (Stichting Kiezersonderzoek Nederland, SKON). These studies have been made possible by grants from Dutch Organization for Scientific Research (NWO), the Ministry of the Interior and Kingdom Relations (BZK), the Remote E-Voting Project (Kiezen op Afstand, KOA) of the Ministry of the Interior and Kingdom Relations (BZK), the Ministry of Health, Welfare and Sports (VWS), the Social and Cultural Planning Office (SCP), and the Department of Political Science, Leiden University. The original collectors of the data do not bear any responsibility for the analyses or interpretations published here. The data are distributed by Steinmetz Archive, Amsterdam, the Netherlands, by the ICPSR, Ann Arbor, Michigan, USA, and the Zentral Archiv, Cologne, Germany.

In order to provide the funding agencies with essential information about the use of the data that have been collected with their assistance, each user of the data is expected to send two copies of each completed and published manuscript to the distributor of the data:

1. General Introduction

1.1 Introduction

The Dutch Parliamentary Election Studies (DPES) of 2002 and 2003 are the tenth and eleventh in a series that began with the study of the parliamentary election in 1971. After researchers at the Free University of Amsterdam had organized a national large-scale study at the election of 1967, in 1971 all Dutch universities conducting research in political science, and in particular on the subject of elections, representation, public opinion, and related topics, joined together to organize the first study in the current DPES series. The pattern of inter-university cooperation has remained the organizational model throughout the series of studies. During the 1970s and 1980s this cooperation was carried out informally, but in 1990 for various reasons a formal structure was set up in the form of the Foundation for Electoral Research in the Netherlands (Stichting Kiezersonderzoek Nederland, SKON). This Foundation has responsibility for overseeing the organization and implementation of a Dutch Parliamentary Election Study in particular and for stimulating research in the study of elections and electoral behavior in general.

During the period in which the election studies of 2002 and 2003 were organized, the board of the Foundation consisted of:

- Dr. C.W.A.M. Aarts University Twente, Enschede
- Prof. P. Dekker Social and Cultural Planning Office of the Netherlands,
the Hague/University of Tilburg, Tilburg
- Prof. C. van der Eijk University of Amsterdam, Amsterdam
- Prof. R. Eisinga University Nijmegen, Nijmegen
- Dr. J.J.M. van Holsteyn Leyden University, Leiden
- Prof. G.A. Irwin (chairman) Leyden University, Leiden
- Prof. J. Kleinnijenhuis Free University, Amsterdam

Prior to the initiation of each new election study, the board of SKON appoints a project director or directors. Dr. J.J.M. van Holsteyn and prof. G.A. Irwin were appointed by the board to serve in this position for the election study of 2002. When the election of 22 January 2003 followed so quickly after that of 15 May 2002, this appointment was extended to include the DPES 2003. They were ably assisted in many aspects of their work by drs. J.E. Elkind and J.M. den Ridder. The former was instrumental in helping to select the sample and design the questionnaires and creating the datasets, in particular for the mail questionnaire as part of the DPES 2002, whereas the latter was responsible for much of the preparation of the combined dataset and this codebook.

One of the responsibilities of the project directors and the board is the selection of the agency that will carry out the interviews. In 2002 the fieldwork was put out for a European tender. Based upon the reactions to this tender, the Netherlands NIPO (now TNS-NIPO, Amsterdam) was contracted to do the fieldwork/data collection. The project team that supervised this data collection for TNS NIPO consisted of: drs. H. Foekema, drs. R. Frerichs and drs. W. Klasema; technical support was provided by P. Weijer.

As the 1998 election study had been carried out by Institute of Applied Social Research (ITS, Nijmegen), which was in possession of the addresses of respondents in that study, SKON asked their successor, Survey Data B.V., Maastricht to carry out the interviews in the panel study (to be described below). On behalf of Survey Data M. Janssen, drs. W.J.L.C.N. Nelissen and R. Vousten participated in the project.

1.2 Funding

The Dutch Parliamentary Election Study 2002 was made possible by grants from the Dutch Organization for Scientific Research (NWO), the Ministry of the Interior and Kingdom Relations (BZK), the Remote E-Voting Project (Kiezen op Afstand, KOA) of the Ministry of the Interior and Kingdom Relations (BZK), the Ministry of Health, Welfare and Sports (VWS), and the Social and Cultural Planning Office (SCP). Leiden University provided research support in the form of the research time of the project directors, as well as use of computing and printing facilities and administrative support.

When the Cabinet fell in October 2002 and new elections were called for 22 January 2003, it suddenly became necessary to organize a new election study. Support for this unexpected study was generously provided by the Dutch Organization for Scientific Research (NWO), the Ministry of the Interior and Kingdom Relations (BZK) and the Social and Cultural Planning Office (SCP) in particular.

2. Research Design

2.1 Core components of the Dutch Parliamentary Election Study 2002 (DPES 2002)

The design of the Dutch Parliamentary Election Studies is dependent upon the situation surrounding the election and the availability of funding. The preferred core design is a data collection wave in the form of face-to-face interviews prior to the election and a second wave of data collection with the same respondents following the election. The latter is essential in order to determine how the respondents have actually voted. This core design was employed in 2002 (see for the design of the DPES 2002 also the *ICORE News*, number 9, October 2002). As noted above, these interviews were carried out in 2002 by TNS-NIPO. The post-election wave included some small-scale experimental data collection methods that will be discussed below. Only the data collected in the pre- and post-election interviews in 2002, together with the data collected in 2003 (see section 2.3) are included in the dataset covered by this codebook.

As the study of vote change can best be studied with longitudinal data, it is the goal of SKON to include a panel element in each election study. An attempt is made to conduct a post-election interview with all respondents who had participated in a post-election interview at the previous election. For this group, information is then available concerning vote choice at two elections. In 2002, post-election interviews were conducted with respondents from 1998. As noted above, these interviews were carried out by Survey Data B.V. An attempt was made to re-interview as many as possible of the 1814 respondents from the post-election wave of the 1998 DPES. Survey Data was able to locate and conduct interviews with 690 of these respondents. Similar to 1998, these respondents were also asked to complete and return a written questionnaire concerning media usage; 637 respondents did so. These data are not documented in this codebook but will be described in a separate codebook.

Information concerning the sample design and concerning specific aspects of the data collection are provided below.

2.2 Additional components DPES 2002

In addition to what can be considered as the core components of a Dutch Parliamentary Election Study, the project directors or other researchers may propose to the board that additional components be added to the study.

In 2002 two proposals were accepted by the board. The first proposal resulted in the inclusion of a follow-up drop-off written questionnaire concerning media usage. This questionnaire was given to all participants in the panel study.

The second proposal was a result of concerns about the rise in costs of face-to-face interviews and led to the proposal to conduct a mail questionnaire with a selection of identical questions from the main survey, so that a comparison could be made with data and results from a mail questionnaire and a face-to-face interview. In May 2002, the day after Election Day, written questionnaires were sent to a sample of 3000 households, selected at random by the Dutch postal service from its list of postal addresses. A letter (reminder) was sent to them two weeks later. Many of the questions from the main study were repeated in this mail survey. A total of 1134 (38 per cent) persons returned the questionnaire. The data from the mail questionnaire are not documented in this codebook.

2.3 The Dutch Parliamentary Election Study 2003 (DPES 2003)

When elections were called in October 2002 for the following January, time, as well as cost and other practical considerations made it impossible to carry out a full-fledged election study in 2003. The design of the DPES 2003 therefore consists of two components (see for the design of the DPES 2003 also the *ICORE News*, number 10, April 2003). First of all, an attempt was made to conduct a new interview with all those who had participated in the post-election wave of interviews in the DPES 2002 after the elections of January 22. In addition, a fresh sample was drawn for 2003. The respondents in this sample were interviewed after the election in January.

3. Sample Design

3.1 Sample selection 2002

The sample of respondents for the Dutch Parliamentary Election Study 1998 was based upon the population register. First, in a random fashion the required number of municipalities was selected. Then, each municipality was asked to draw a random sample of eligible voters. Such a procedure had clear advantages over the procedures employed in previous studies. Therefore an attempt was made to replicate this procedure in 2002. However, it quickly became clear that the number of municipalities that refused to cooperate was considerably higher than in 1998. This meant that the procedure would not necessarily lead to a better sample than other procedures. Moreover, among those who were willing to cooperate, substantial amounts of money were often requested in order to draw the sample. For these reasons, the attempt was abandoned and the decision was made to draw the sample according to a procedure more similar to that followed before 1998.

3.2. Selection of municipalities

The first step in selection of the sample in 2002 was to determine those municipalities in which interviews would be held. The list of municipalities was downloaded from the Statline website of the Statistics Netherlands on December 13, 2001. This list was then sorted according to region and degree of urbanization. The selection of municipalities was by means of systematic random sampling. To begin this process, the relevant skip interval was determined by dividing the total number of inhabitants in all Dutch municipalities by 2000, the desired sample size. This value was then multiplied by 20, which was the minimum size cluster of interviews to be held

in any single municipality. Using the random number generator in Excel, a random start position was determined. The municipality in which this number fell was included in the sample. The skip interval was then added the requisite number of times and each municipality in which such a value fell was included in the sample. In the larger cities, more than one cluster of interviews was drawn and as a result more than 20 interviews were held.

Interviews were held in a total of 90 Dutch municipalities. The number of interviews held in each of these municipalities is listed in the codebook (see chapter 5). However, in order to protect the privacy of respondents, the variable indicating in which municipality a respondent was interviewed has been removed from the dataset documented here. Researchers can apply for a dataset with this variable included; this application should be addressed to the chairman of SKON.

3.3 Selection of respondents and net results

In the 90 municipalities mentioned in section 3.2, TNS-NIPO generated a random sample of in total 8893 telephone numbers. Of these 2070 were found to be numbers that were not related to a household. This resulted in 6823 telephone numbers that were related to a household. For these households, data on name, address and municipality of residence was combined with the telephone number. Each household was then sent a letter in which the importance of participation in the study was emphasized. This was followed by telephone contact from the telephone fieldwork division of TNS-NIPO, in which potential respondents were asked whether they were willing to participate in the study. For various reasons (no answer, answering machine, busy signal, non-eligible for study, etc.) 1032 of the telephone numbers were not usable. Among those who were contacted, 3541 refused to participate, while 2250 to be interviewed. Based upon these figures, the response rate for 2002 can be calculated as 39 per cent.

Interviewers from TNS-NIPO attempted to contact these 2250 respondents to arrange a face-to-face interview. In 343 cases participation proved to be impossible because either no one was home, no house could be found at the specified address, or the respondent withdrew consent. The interviews were held during period between April 18, 2002 and May 14, 2002 (the election was held on May 15). This resulted in 1907 completed interviews in the pre-election phase.

3.4 Attempts to increase response

Three means were employed to insure the greatest response rate possible. First, respondents were sent a letter announcing the election study and emphasizing the importance of the study. This letter was signed by R. Frerichs, on behalf of TNS-NIPO and G. Irwin, on behalf of SKON. Second, monetary incentives for participation were provided. In appreciation of their participation, respondents were given a gift coupon worth five Euros or could designate a charity of their choice to receive a donation in this amount. This incentive was provided for both the pre-election and post-elections waves of interviews. A respondent could therefore earn a total of ten Euros in gift coupons or donations. Third, TNS-NIPO made use of its most experienced interviewers for this study. In the pre-election survey 245 face-to-face interviews were employed; in the post election wave 192 were employed. As far as possible, attempts were made to let the same interviewer carry out the post-election interview as had conducted the pre-election interview with a respondent.

3.5 Fieldwork and data collection

3.5.1 Pre-election fieldwork (first wave)

The face-to-face interviews were conducted by means of Computer Aided Personal Interviewing (CAPI). Laptop computers were programmed with the questionnaire and all responses, including answers to open-ended questions, were typed directly into the computer. The questionnaires for both the pre-election and post-elections waves were tested: a) in a joint session involving representatives from TNS-NIPO and SKON, b) in a test session organized by TNS-NIPO with trial respondents, and c) in trial interviews conducted by representatives of SKON.

When the assassination of Pim Fortuyn on May 6 necessitated some last minute alterations of the questionnaire, interviewers were sent an email on May 7 indicating the changes and how they were to be implemented.

Interviewer instruction was provided in the pre-election wave by means of a 15 minute video tape. This tape included information from J.J.M. van Holsteyn on behalf of SKON, H. Foekema and R. Frerichs as TNS NIPO project directors, and from Th. Gosman on behalf of the fieldwork division of TNS NIPO. For the post-election wave of elections, instruction was provided in written form. Interviews in the pre-election phase were held between April 18, 2002 and May 14, 2002. The election was held on May 15. On the following day, interviewing began in the post-election wave.

The average length of the pre-election interview was 51 minutes and that of the post-election interview 48 minutes.

3.5.2 Post-election wave fieldwork (second wave)

1907 respondents participated in the pre-election wave of interviews. At the end of that interview, they were asked if they would agree to be interviewed again shortly after the election. At this stage of the study, new innovations in data collection were introduced. In order to guarantee continuity with previous election studies, most respondents (n=1200) were re-interviewed face-to-face. However, a portion of the respondents was given the option of choosing their preferred means of data collection. The respondent could express a preference to again be interviewed face-to-face, but three additional options were also made available. These included receiving a written questionnaire to be mailed back to TNS-NIPO, receiving a diskette containing the questionnaire which could be filled out on the respondent's own computer and then mailed to TNS-NIPO, or filling out the questionnaire via an on-line connection to TNS-NIPO. These methods of data collection are potentially less expensive than face-to-face interviews and may also have various advantages for the respondent. A total of 374 respondents made their own choice; the distribution of these choices is as follows:

-	Face-to-face	(with laptops)	129	35
-	Written		127	34
-	Diskette		65	17
-	Internet		53	14
	Total		N=374	100%

A total of 1574 respondents participated in the post-election wave; this amounted to 82 per cent of those who had participated in the pre-election wave.

Data collection during the post-election wave began on May 16, the day following the election. Face-to-face interviews were held until June 27, 2002. The diskettes and written questionnaires were mailed out on June

7 with a request to be returned by June 17; not all were returned however by this date. The data collection via internet was conducted between June 14 and June 24, 2002.

The average length of the post-election face-to-face interview has been mentioned above as 48 minutes. The average for the internet response was 40 minutes. No information is available for the average amount of time respondents spent on answering either the paper or diskette questionnaire.

3.6 Study design 2003

When the Dutch government fell in October 2003, it was announced that a new election would be held on January 22, 2003. This decision caused numerous problems for the design and general organization of a new Dutch Parliamentary Election Study. Because it came so soon after the previous election, financial resources were very limited. Secondly, in order to carry out a pre-election wave of data collection, interviews would have to be held during the Christmas/New Year holiday period. Not only did it seem unlikely that this would be a good time to contact respondents, TNS-NIPO could not guarantee the availability of a sufficient number of high quality interviewers during this period. For these reasons it was decided to collect data only after the election had been held.

Because of, for example, the rapid rise but almost as rapid fall of the List Pim Fortuyn (LPF) and the electoral resurrection of the Labor Party (PvdA), at least in the polls, the panel element, which has been considered a standard part of the core design, became even more important for the DPES 2003. An attempt was made to interview all those 1574 respondents who had participated in the 2002 post-election wave again following the election in 2003. As the time between elections was relatively short and interest in politics had generally remained high or maybe even increased, it was possible to re-interview 81% (n=1271) of the 1574 respondents from the post-election wave of the 2002 study. The average length of these interviews was approximately 45 minutes.

In addition to the panel study, a fresh sample was drawn in the same manner as in 2002. The number of municipalities was 63; these are listed in the codebook, although for privacy reasons, this variable is available only on request. The interviews were held between January 23, 2003 and March 3, 2003. The total number of respondents was 1287. The average length of the interviews was approximately 60 minutes.

3.7 Sample checks

Statistical sampling theory demonstrates that no random sample is likely to perfectly reproduce the population parameter values. However, according to this same theory confidence intervals can be computed to indicate, for example, that 95 per cent of all samples of a particular size should be within a certain distance from these population values. A sample of size 1500 designed to estimate population percentage values should be within approximately 2.5 per cent in 95 per cent of all samples.

The calculation of confidence intervals is, of course, based upon textbook random sampling techniques. In practice, especially in large-scale survey research, it is never possible to duplicate these textbook procedures. It is seldom if ever possible to utilize a sampling frame that fully replicates the complete population (for example, voters living in foreign countries are not included in the sample). More seriously, even when one draws the sample as carefully as possible, not all of those selected are willing to participate in the study. It has already been mentioned above that large numbers of those selected for the DPES 2002 could not be contacted or

declined to participate in the study. Moreover, at the post-election wave of data collection some of those who participated in the pre-election wave cannot be contacted or decline to be interviewed again. This raises questions concerning how well the sample is able to reproduce population values.

Most population values are unknown so that it is impossible to make comparisons. However, distributions of some social-demographic characteristics are known and readily available from the Statistics Netherlands (www.cbs.nl). In addition, the central variable in any election, the election results, has a known distribution. Comparisons can then be made between the values in the sample and these known values in order to determine how well the sample reflects the population values.

Statistics Netherlands publishes population characteristics as of January 1 of each year. Because the 2003 election was held in January and the new figures were not available, the 2002 figures are used here. The changes in percentages in such frequency distributions are very small from one year to the next. By using the 2002 figures, both samples can be compared to a single set of frequency distributions. The population characteristics that are available for comparison are: sex, age, marital status, size of household, region of residence, and degree of urbanization of municipality of residence. Population figures include inhabitants of all ages; for the variables sex, age, and marital status these figures have been corrected to exclude those under voting age of 18. Region and degree of urbanization include inhabitants of all ages. The official election results for each election are used for comparison with the sample estimates of these results. Since vote choice is such a central variable in an election study, the comparisons for the 2002 election are based on the post-election wave in which the vote choice question is included. For 2003 comparisons are made with the fresh sample, rather than for the panel aspect of the 2002 study. The comparisons are presented in Table 1a and Table 1b.

It is immediately clear that few of the estimates are within the 2.5 per cent range expected from sampling theory. The distribution of male-female, region, and degree of urbanization for 2002 (and some of the percentages for other characteristics) fall within this range. In 2003, females are overrepresented in the sample. Both samples exhibit fairly substantial underrepresentation of voters in the 18-34 age groups. Given this fact, it is then not so surprising that unmarried persons and persons living in single-person households are underrepresented in both samples. The 2003 sample deviates more from population percentages by region, with overrepresentation of those in the north and east of the country and underrepresentation of those in the west. This probably helps account for the overrepresentation of rural areas and underrepresentation of those in moderately urban areas.

<i>Table 1a. Comparison of sample estimates (DPES) and population values</i>			
Variable	2002 population parameter (%)	2002 sample estimate post-election (%)	2003 sample estimate (%)
<i>Sex</i>			
Male	49.0	48.3	45.1
Female	51.0	51.7	54.9

<i>Age</i>			
18-24	10.7	5.9	5.7
25-34	19.0	12.3	11.9
35-44	20.6	22.0	28.5
45-54	18.4	21.2	20.8
55-64	13.7	18.7	19.4
65-74	9.7	13.0	9.9
75+	7.9	7.1	3.8
<i>Marital Status</i>			
Unmarried	29.3	20.4	23.1
Married	56.4	67.1	62.3
Widowed	7.0	6.5	6.5
Divorced	7.3	6.0	8.1
<i>Size of household</i>			
Single person	33.8	17.2	20.5
More than one person	66.2	82.8	79.5
<i>Region of residence</i>			
North	10.5	11.3	16.1
East	20.7	21.7	25.6
West	46.7	45.2	36.3
South	22.1	21.9	21.9
<i>Degree of urbanization of municipality of residence</i>			
Very strongly urban	17.8	16.3	18.1
Strongly urban	26.5	25.9	22.9
Mildly urban	20.6	21.1	13.5
Hardly urban	21.5	22.0	25.8
Not urban	13.7	14.8	19.7

LN	1.6	0.9	0.4	0.3
Other	0.7	0.1	0.9	0.6
Source for election results Statistics Netherlands				

The greatest deviation of sample estimates from population values is found in the election results (see Table 1b). Both samples seriously underestimate the percentage of non-voters. In the 2002 election, the

percentage of non-voters was 20.9, whereas only 3.2 per cent of those in the samples indicated they had not voted. The figures for 2003 are hardly better, with a population value of 20 per cent and a sample estimate of 5.0 per cent. These discrepancies are greater than in previous Dutch Parliamentary Election Studies.

In terms of vote choice, the most serious discrepancy between the samples and the actual election results is the underestimation of voters for the List Pim Fortuyn (LPF) in 2002. With a six percent underestimation, the figures for most other parties are slightly overestimated, in particular the parties to the left (D66, PvdA, GroenLinks and SP). In 2003 the percentage for the LPF is also underestimated, but since the actual result dropped to 5.7 per cent the underestimation in this case is only 2 per cent. Once again, the percentage for the VVD is slightly underestimated and the percentages for the left parties (with the exception of the PvdA) are slightly overestimated.

3.8 Weights

The previous section has demonstrated that the samples for the DPES 2002 and 2003 do not accurately estimate population parameters for all known population characteristics. By far the most serious deviation is the underestimation of non-voters in the two samples. It is possible to 'correct' these deviations by computing weights to be assigned to each voter that will allow for the sample more accurately reflecting the true values in the population.

In the dataset documented in this codebook, eight weighting values have been computed; four for the 2002 sample and four for the 2003 sample. The weights have been computed according to procedures described in J.J.G. Schmeets and E.J.E. Molin, *Nationaal Kiezersonderzoek 1989: Constructie en evaluatie van weegmodellen in kiezersonderzoek* (Centraal Bureau voor de Statistiek, BPA no.: H3658-90-S5, 9 August 1990) and Jelke G. Bethlehem, 'Weighting Nonresponse Adjustments Based on Auxiliary Information', in Robert M. Groves et al. (eds), *Survey Nonresponse* (New York: John Wiley, 2001). For each sample weights have been calculated according to the linear method and according to the multiplicative method. Weights have been computed based upon the social-demographic characteristics alone and with these characteristics combined with the electoral results. This procedure results in the following weight variables (see Table 2).

Table 2. Weight variables for the 2002 and 2003 samples		
	2002	2003
Socio-demographic variables linear method	SDLM02	SDLM03
Socio-demographic variables multiplicative method	SDMM02	SDMM03
Socio-demographic variables plus election results linear method	SDELM02	SDELM03
Socio-demographic variables plus election results multiplicative method	SDEMM02	SDEMM03

The weights based on socio-demographic variables for 2002 vary between .39 and 2.07 for the linear method and .54 and 2.53 for the multiplicative method. As shown in section 3.7, the sample for 2003 showed somewhat greater deviations from the population values than did the 2002 sample. This results in a greater range of weights: between -.14 and 3.27 for the linear method and .31 and 5.52 for the multiplicative method. Since the greatest deviation was found for non-voters, weights that include the election results must be even greater in order to 'correct' the sample estimates. For 2002 the weights based upon both socio-demographic characteristics and the election results vary between -.02 and 7.47 for the linear method and .30 and 12.60 for the multiplicative method. For 2003 these values are -.57 and 5.32 and .18 and 11.01 respectively. The correlations between the

linear and multiplicative versions with the same variables are all greater than .9. The correlations between versions with voting behavior and those without are much lower (approximately .3 in 2002 and .6 in 2003).

Negative weight values will not be accepted by certain procedures in SPSS. Nevertheless, they have been obtained in the dataset so that the individual researcher can determine for him- or herself what to do to deal with this situation.

SKON is extremely grateful to Jan Spit of the Social and Cultural Planning Office for the calculation of these weights.

4. Added variables and coding schemes

4.1 Added indexes

4.1.1 Construction of scale scores

The data file contains several series of variables that can be considered as indicators of a single latent construct. It has become a standard practice to combine these variables into indices or scales. This practice has been continued in 2002 and 2003. The construction of these scales is described in the following sections. The report summarizes for each scale score, from which variables it has been constructed and the values which were selected as positive response. For the argumentation of this way of construction, see DPES 1994 and DPES 1998 (H. Anker and E.V. Oppenhuis, 1995, *Dutch Parliamentary Election Study 1994*, Amsterdam: Steinmetz Archive/SWIDOC; K. Aarts, H. van der Kolk and M. Kamp, 1999, *Dutch Parliamentary Election Study 1998*, Amsterdam: NIWI/Steinmetz archive). The frequency distribution of the resulting scale score is reported in the documentation of variables.

4.1.2 A list of scales added to the data file

Political interest score (V0005 and X0032)

The Political interest score (range: 0-4) was established by counting the “positive” responses to questions related to interest in politics.

<i>Label</i>	<i>positive responses</i>	<i>Question number 2002</i>	<i>Question number 2003</i>
Reads about national news?	1	V0001	X0028
Talks about national news?	1,2	V0002	X0029
Reads about foreign news?	1,2	V0003	X0030
Interested in politics?	1	V0004	X0031

Policy satisfaction score (V0153)

The Policy satisfaction score (range 0-3) was established by counting the “positive” responses to the questions related to satisfaction with governmental policy.

<i>Label</i>	<i>positive responses</i>	<i>Question number 2002</i>
Effect governmental policy on economic situation	1	V0149
Effect governmental policy on employment	1	V0150
General satisfaction with government	1,2	V0152

Political Knowledge -1 (V0325)

The questions about name, party and function of four politicians whose photograph was shown, are summarized in two distinct scale scores, V0325 and V0326. The Political Knowledge score 1 (range 0-12) was established by counting the “positive” responses to all twelve questions.

<i>Label</i>	<i>positive responses</i>	<i>Question number 2002</i>
Photo 1: Tineke Netelenbos	1	V0301
Photo 1: Party of Netelenbos (PvdA)	1	V0303
Photo 1: Political function of Netelenbos	1	V0305
Photo 2: Boris Dittrich	1	V0307
Photo 2: Party of Dittrich (D66)	4	V0309
Photo 2: Political function of Dittrich	1	V0311
Photo 3: Annemarie Jorritsma	1	V0313
Photo 3: Party of Jorritsma (VVD)	3	V0315
Photo 3: Political function of Jorritsma	1	V0317
Photo 4: Jeltje van Nieuwenhoven	1	V0319
Photo 4: Party of Van Nieuwenhoven	1	V0321
Photo 4: Political function of Van Nieuwenhoven	1	V0323

Political Knowledge -2 (V0326)

The second scale, Political Knowledge score 2 (range: 0-4) was established by counting the number of times the respondent correctly answered all three questions regarding a politician in the series of questions.

<i>Label</i>	<i>Question number 2002</i>
Name, party and function Netelenbos correct	V0301-V0306
Name, party and function Dittrich correct	V0307-V0312
Name, party and function Jorritsma correct	V0313-V0318
Name, party and function Van Nieuwenhoven correct	V0319-V0324

External political efficacy score (V0921 and X0390)

The External political efficacy score (range 0-5) was established by counting the “positive” responses to five statements.

<i>Label</i>	<i>positive response</i>	<i>Question number 2002</i>	<i>Question number 2003</i>
MP's do not care about opinions of people like me	2	V0916	X0385
Parties are only interested in my vote, not in my opinion	2	V0917	X0386
People like me have no influence on politics	2	V0918	X0387
So many people vote, my vote does not matter	2	V0919	X0388
MP's quickly lose contact with citizens	2	V0920	X0389

Note: This score differs from the score used until 1994. In 1998 a fifth item has been introduced.

Internal political efficacy score (V0925 and X0394)

The Internal political efficacy score (range 0-3) was established by counting the “positive” responses to three statements.

<i>Label</i>	<i>positive responses</i>	<i>Question number 2002</i>	<i>Question number 2003</i>
Consider myself qualified for politics	1,2	V0922	X0391
Well informed about political problems	1,2	V0923	X0392
Politics sometimes too complicated	3,4	V0924	X0393

Political cynicism score (V0929 and X0398)

The Political cynicism score (range 0-3) was established by counting the “positive” responses to three statements.

<i>Label</i>	<i>positive responses</i>	<i>Question number 2002</i>	<i>Question number 2003</i>
Politicians promise more than they can deliver	1,2	V0926	X0395
Ministers and junior-ministers are primarily self-interested	1,2	V0927	X0396
Friends more important than abilities to become MP	1,2	V0928	X0397

Confessional attitude score (V0965)

The Confessional attitude score (range 0-5) was established by counting the “positive” responses to questions related to the religious (confessional) basis of various organizations.

<i>Label</i>	<i>positive responses</i>	<i>Question number 2002</i>
Should there be confessional parties?	2	V0960
Should there be confessional unions?	2	V0961
Should there be confessional schools?	2	V0962
Should there be confessional radio and TV?	2	V0963
Religion is a good guide in politics	1,2	V0964

4.2. Coded variables/coding schemes

A limited number of open-ended questions have been included in the questionnaire. The answers to these questions are included verbatim in the dataset as string variables. The answers have also been coded and are included in the dataset in two ways. First, a variable is included for each category of the coding scheme. This variable notes whether the respondent included this code or not. Second, a number of variables record the first, second, etc. response given.

V0037-V0076; X0073-X0117	Most important national problem
V0244-V0278; V0759-V0778; X0294-X0316	Reason for not voting (in most recent municipal elections)
V0649-V0674; X0197-X0222	Reason for party choice
V0584-V596	Reason for resignation Purple Cabinet
X0001-X0018	Reason for resignation Balkenende Cabinet

4.3 Other added variables

4.3.1 Education

The data-set contains several variables pertaining to education. These variables provide information about educational attainment of the respondent, his or her partner and the head of household. In this section a

description of the meaning of the codes of all types is presented. Although the coding scheme is almost equivalent to that of 1998, the codes are labeled differently. Note in particular that the code from undergraduate and graduate level education differs from 1998 to 2002/2003.

code 2002	code 1998	labels and translation
		<i>Elementary level:</i>
1	1	elementary (lager onderwijs)
2	2	extended elementary (VGLO, LAVO)
3	3	(lower) vocational (LTS, Huishoudschool, LEAO)
		<i>Secondary level:</i>
4	4	middle level secondary ((M)ULO, 3-jarige HBS, MAVO)
5	5	middle level vocational (MEAO, UTS)
6	6	higher level secondary (5-jarige HBS, Gymnasium, MMS, Lyceum, Atheneum, HAVO)
7	7	higher level vocational (MBO, MTS)
		<i>Post-secondary level:</i>
8	8	undergraduate level vocational (HTS, HEAO, Sociale of Pedagogische Academie, Kunstonderwijs, Zeevaartschool, Kweekschool, SPD, GA-1)
9	9	graduate level vocational (MO-akten, Accountancy, Beroeps Officiersopleiding, GA-2, GF, etc.)
10	10	undergraduate level (Hogeschool)
11	10	graduate level (Universiteit)

4.3.2 Party identification

The variable Strength of Party identification is the same variable as the variable Strength of Party adherence from the DPES 1998. The values of V0112 have been assigned in the same manner as in 1998:

- 0 'neither adherent, nor attracted': if V0109 = 2.
- 1 'DK whether attracted': if V0109 = 997.
- 2 'attracted, not adherent' if V0109 = 1 and V0110 < 14.
- 3 'attracted, DK whether adherent' if V0103 = 14 and V0109 = 1 and V0110 < 14.
- 4 'adherent, not convinced' if V0087 = 1 and V0108 = 3 and V0103 < 14.
- 5 'adherent, DK whether convinced' if V0087 = 1 and V0108 = 4 and V0103 < 14.
- 6 'adherent, convinced' if V0087 = 1 and V0108 = 2 and V0103 < 14.
- 7 'adherent, very convinced' if V0087 = 1 and V0108 = 1 and V0103 < 14.
- 8 'NA1 (adherent, DK party)' if V0087 = 1 and V0103 = 14.
- 9 'NA2 (attracted, DK party)' if V0109 = 1 and V0110 = 14.
- 997 'DK' if V0087 = 3 or 4.

4.3.3 Household composition

The data file contains a large number of variables describing the composition of the household the respondent belongs to (2002: V0417-V0445, 2003: X0461-X0483). This information was obtained during the first wave of interviews in 2002, and during the fresh interview in 2003. The variable Composition of household (V0418 and X0462) has been constructed from the following interview question:

I/370 and III/2060

“Can you tell me how the household that you belong to is composed? This is about all persons who live in this household, so including eventual residents. Can you tell me for each of the persons mentioned what relationship they have with you, for example your child, father or mother?”

4.3.4. Coalition preference

The variable ‘Coalition preference’ (V0350 and X0369) has been constructed from the variables V0327-V0338 for 2002 and X0345-X0362 for 2003. Please note that the question, which is generally included in a pre-election interview, has been asked in 2003 after the elections and during the formation of the new cabinet (at which time the coalition CDA-PvdA seemed most obvious). The question, however, had the same format in 2002 and 2003: “After the elections in the Second Chamber, a new cabinet must be formed. In the Netherlands, a cabinet is mostly formed by different parties. According to you which parties should be part of the next cabinet?”

Because the large number of different coalitions that were mentioned, see the data-set for the distribution of this variable. The answer for the above question for each party is displayed in the codebook.

4.3.5 Electoral cohort

Variables V0458 and X0497 provide information of the electoral cohort the respondent is member of. The variables are constructed with help of the age of the respondent and make clear in which parliamentary election the respondent could have made his first contribution. Note that the age at which a citizen is entitled to vote has changed over time:

before 1945: 25 years

1946-1963: 23 years

1967-1971: 21 years

1972 till now: 18 years

5. Documentation of variables

This codebook covers four sets of interviews held in connection with the Dutch Parliamentary Election Studies of 2002 and 2003. The composition of the dataset is detailed in Table 3.

Table 3. Composition of dataset DPES 2002 and DPES 2003		
	DPES 2002	DPES 2003
Pre-election 2002, post-election 2002, post-election 2003	N=1287	N=1287
Pre-election 2002 and post election 2002	N= 287	---
Pre-election 2002 only	N= 333	---
Fresh sample 2003	---	N=1271
Total per year	N=1907	N=2558
Overall total cases in dataset (N = 3178)		

A variable labeled TYPE has been added to the dataset including the above information. This variable TYPE can be used to select which subset(s) of respondents to include in the analysis.

Variables related to questions posed to the sample of respondents originally selected in 2002 are designated by a label beginning with the letter V. Variables relating to the fresh sample drawn for the study in 2003 have been designated by a variable beginning with the letter X. A number of additional identification variables have been added for both the 2002 and 2003 components; these variables are indicated by acronyms.

5.1 Guide to the documentation of variables

Most of the variables in the Dutch Parliamentary Election Studies are based upon closed-ended questions. In general the order of the variables follows that of the original questionnaires. For each variable a label indicates the original position in the questionnaire. The original question wording is given in Dutch as well as in English translation. The values are labeled only in English.

A number of open-ended questions were also included in the questionnaires. The original verbatim answers (in Dutch) have been included in this dataset. In addition, these answers were coded by TNS-NIPO according to coding schemes provided by the project directors. These responses are coded in a number of variables. In most cases dummy variables indicate whether or not the response was given while other variables indicate what the first to last response of each respondent to the question was.

In addition to these variables that are related directly to the responses to the questions posed in the interview, a number of additional variables have been included in this codebook. It has become standard practice to combine certain variables into indices or scales. These include political interest, satisfaction with government, external efficacy, internal efficacy, political cynicism, confessional attitude, political knowledge and strength of party identification. The description of the construction of these variables can be found in section 4.

5.2 Variable description list

number	label	page
stud	0/ Study number	49
ridn	0/ Respondent identification number	49
type	0/ Type of interview record	49

Social class and income		
X0544	III/2380 Social class -self image	537
X0545	III/2390 Total net income per household	538

5.3 Documentation of variables of the main study: first wave DPES 2002

Interview identification (2002-2003)

stud	Study number <i>The Steinmetz study number of the special file is P1628</i>			
ridn	Respondent identification number <i>The respondent identification number ranges from 100005 to 907457</i>			
type	Type of interview record			
	1. 2002 first wave only	333	10.5	10.5
	2. first and second wave 2002	287	9.0	9.0
	3. first, second and third wave 2002/2003	1287	40.5	40.5
	4. 2003 only	1271	40.0	40.0
		3178	100	100

The following variables can be used to weight the units in the sample in order to reproduce the frequency distribution of known population parameters in the sample. The description of these variables is found in Section 3.8 of the introduction.

sdelm02	Socio-demographic variables plus election linear method 2002 <i>From -0.02 to 7.47</i>
sdlm02	Socio-demographic variables linear method 2002 <i>From 0.39 to 2.07</i>
sdemm02	Socio-demographic variables plus election multiplicative method 2002 <i>From 0.30 to 12.60</i>
sdmm02	Socio-demographic variables multiplicative method 2002 <i>From 0.54 to 2.53</i>
sdelm03	Socio-demographic variables plus election linear method 2003 <i>From -0.57 to 5.32</i>
sdlm03	Socio-demographic variables linear method 2003 <i>From -0.14 to 3.27</i>
sdemm03	Socio-demographic variables plus election multiplicative method 2003 <i>From 0.18 to 11.01</i>
sdmm03	Socio-demographic variables multiplicative method 2003 <i>From 0.31 to 5.52</i>

urb02 Degree of urbanization

This variable gives an indication of the degree of urbanization of the municipality the respondent lives in. The codes are designed by Statistics Netherlands.

<i>Code</i>	<i>Label</i>	<i>Description</i>		
1.	very strongly urban	more than 2,500 addresses per square kilometer		
2.	strongly urban	1,500 – 2,499 addresses per square kilometer		
3.	mildly urban	1,000 – 1,499 addresses per square kilometer		
4.	hardly urban	500 – 999 addresses per square kilometer		
5.	not urban	1 – 499 addresses per square kilometer		
1.	very strongly urban	323	16.9	16.9
2.	strongly urban	496	26.0	26.0
3.	mildly urban	403	21.1	21.1
4.	hardly urban	420	22.0	22.0
5.	not urban	265	13.9	13.9
		1907	100	100

V0001 Reads about national news

First I want to ask you a few questions about the news in Dutch newspapers. When there is domestic news in the newspapers, for example news about government problems, how often do you read such news?

Allereerst wil ik u een paar vragen stellen over het nieuws in de krant. Als er in de krant binnenlands nieuws staat, bijvoorbeeld nieuws over regeringsproblemen, hoe vaak leest u dat dan?

Showcard 1 presented, listing response alternatives

1.	(nearly) always	780	40.9	40.9
2.	often	456	23.9	23.9
3.	now and then	463	24.3	24.3
4.	seldom or never	120	6.3	6.3
5.	does not read paper	88	4.6	4.6
		1907	100	100

V0002 Talks about national news

When there is a discussion in a group about such problems in our country, do you generally join the conversation, do you listen with interest, do you not listen or are you not interested?

Als er in gezelschap over zulke problemen in ons land gesproken wordt, doet u dan meestal mee met het gesprek, luistert u met belangstelling, luistert u niet of heeft u geen belangstelling?

1.	joins conversation	1249	65.5	65.7
2.	listens with interest	580	30.4	30.5
3.	does not listen/not interested	73	3.8	3.8
4.	DK	4	0.2	MD
5.	NA	1	0.1	MD
		1907	100	100

V0003 Reads about foreign news

When there is foreign news in the newspaper, for example about tensions or discussions between different countries, how often do you read such news?

Als er in de krant buitenlandse nieuws staat, bijvoorbeeld nieuws over spanningen of besprekingen tussen verschillende landen, hoe vaak leest u dat dan?

Showcard 1 used, listing response alternatives

Routing, if V0001 is not code 5

1.	(nearly) always	565	29.6	31.1
2.	often	553	29.0	30.4
3.	now and then	556	29.2	30.6
4.	seldom or never	144	7.6	7.9
5.	NA	1	0.1	MD
	INAP	88	4.6	MD
		1907	100	100

V0004 Interested in politics

Are you very interested in political topics, fairly interested or not interested?

Bent u zeer geïnteresseerd in politieke onderwerpen, tamelijk geïnteresseerd of niet geïnteresseerd?

1.	very interested	466	24.4	24.4
2.	fairly interested	1270	66.6	66.6
3.	not interested	171	9.0	9.0
		1907	100	100

V0005 Political interest score 2002 (pre election)

Constructed from V0001 to V0004. Refer to 4.1.2 for the construction of the index.

0.	low	51	2.7	2.7
1.		590	30.9	30.9
2.		482	25.3	25.3
3.		497	26.1	26.1
4.	high	287	15.0	15.0
		1907	100	100

V0085 Most important national problem –open answer

answered	1843
INAP	64
	1907

V0086 The way in which the government handled the most important national problem

If you think about this problem (answer V0084), what do you think about the way the government has handled this problem during the past years? Has the government done a very good job, a good job, a poor job or a very poor job?

Als u nadenkt over dat probleem (genoemd bij V0084), wat vindt u dan van de manier waarop de regering dit probleem de afgelopen jaren heeft aangepakt? Heeft de regering dit heel goed gedaan, goed gedaan, slecht gedaan of heel slecht gedaan?

Routing, if V0085 has been answered

1.	very good	5	0.3	0.3

V0087 Respondent is (not) adherent to a party

Many people think of themselves as adherents to a particular political party, but there are also people who do not think of themselves as an adherent to a political party. Do you think of yourself as an adherent or not as an adherent to a political party?

Veel mensen voelen zich aanhanger van een bepaalde politieke partij, maar er zijn ook mensen die zich geen aanhanger van een politieke partij voelen. Voelt u zich

aanhanger of voelt u zich geen aanhanger van een politieke partij?

V0149 Effect government policy on economic situation

I would now like to ask a few questions about what you think of the policies that the government has conducted during the past four years. First, the ECONOMIC SITUATION OF THE NETHERLANDS: do you think that the economic situation has been influenced favorably, unfavorably or neither by the government policies?

Ik wil nu een paar vragen stellen over wat u vindt van het beleid dat de afgelopen 4 jaar door de regering gevoerd is. Allereerst de ECONOMISCHE TOESTAND VAN NEDERLAND: denkt u dat de economische toestand door het gevoerde regeringsbeleid gunstig, ongunstig, of niet gunstig maar ook niet ongunstig is beïnvloed?

Showcard 3 presented, listing response alternatives

1.	favorably	985	51.7	52.8
2.	unfavorably	205	10.7	11.0
3.	not (un)favorably	674	35.3	36.2
4.	DK	42	2.2	MD
5.	NA	1	0.1	MD
		1907	100	100

V0150 Effect government policy on employment

And EMPLOYMENT: do you think that employment in the Netherlands has been influenced favorably, unfavorably, or neither by the government policies?

En de WERKGELEGENHEID: denkt u dat de werkgelegenheid in Nederland door het gevoerde regeringsbeleid gunstig, ongunstig, of niet gunstig maar ook niet ongunstig beïnvloed is?

Showcard 3 used, listing response alternatives

1.	favorably	1259	66.0	67.4
2.	unfavorably	186	9.8	10.0
3.	not (un)favorably	422	22.1	22.6
4.	DK	40	2.1	MD
		1907	100	100

V0151 Effect government policy on respondents finances

And your PERSONAL FINANCIAL SITUATION: do you think that your personal financial situation has been influenced favorably, unfavorably, or neither by the government policies?

En uw PERSOONLIJKE FINANCIËLE SITUATIE: denkt u dat uw persoonlijke financiële situatie door het gevoerde regeringsbeleid gunstig, ongunstig, of niet gunstig maar ook niet ongunstig is beïnvloed?

Showcard 3 used, listing response alternatives

1.	favorably	660	34.6	35.2
----	-----------	-----	------	------

2.	unfavorably	359	18.8	19.1
3.	not (un)favorably	857	44.9	45.7
4.	DK	28	1.5	MD
5.	NA	3	0.2	MD
		1907	100	100

V0152 General satisfaction with government

With the help of this showcard, could you indicate how satisfied or dissatisfied you are IN GENERAL with what the government has done during the past four years?

Kunt u met behulp van het toonblad aangeven hoe tevreden of ontevreden u IN HET ALGEMEEN bent met wat de regering in de afgelopen 4 jaar heeft gedaan?

Showcard 4 presented, listing response alternatives

1.	very satisfied	16	0.8	0.8
2.	satisfied	637	33.4	33.6
3.	satisfied nor dissatisfied	818	42.9	43.1

V0181 Frequency of encountering poll results

Prior to the elections many opinion polls are held to discover how people are planning to vote. How often during the last weeks have you noticed such polls in the newspapers or on radio and television? Was that almost never the case, occasionally, frequently or very often?

Voorafgaand aan verkiezingen worden nogal eens opiniepeilingen gehouden om er achter te komen wat mensen van plan zijn te gaan stemmen. Hoe vaak bent u in de laatste weken uitslagen van dergelijke peilingen tegengekomen in de krant en op de radio en televisie? Was dat vrijwel nooit het geval, weleens, meermalen of zeer vaak?

1.	(almost) never	126	6.6	6.7
2.	occasionally	407	21.3	21.5
3.	frequently	758	39.7	40.1
4.	very often	600	31.5	31.7
5.	DK	16	0.8	MD

V0183 PvdA: Present number of seats

We would now like to ask a few questions about some of the political parties and the size of their support. It is no problem if you do not know an answer precisely. In that case you may give your best possible estimate.

How many seats does the PvdA have in the Second Chamber?

Wij willen u nu een paar vragen stellen over enkele politieke partijen en de grootte van hun aanhang. Als u het niet zo precies weet, dan is dat niet erg. Geeft u dan maar een zo goed mogelijke schatting.

De PvdA. Hoeveel zetels heeft de PvdA in de Tweede Kamer?

Parties were presented in random order

	from 1 to 97	1662	87.2	100.0
997.	DK	245	12.8	MD

997.	DK	200	10.5	MD
998.	NA	1	0.1	MD
		1907	100	100

V0200 Party choice in the following situation: PvdA 36, VVD 37, CDA 30, GL 10, D66 9, LPF 14, other parties 14

We have been discussing the distribution of seats in the Second Chamber. The government coalition, that is to say the parties that make up the government, consists at the moment of the PvdA, VVD and D66, the so-called Purple coalition. To form a government coalition it is necessary to have the support of a majority of the Second Chamber. The Second Chamber consists of a total of 150 seats. A coalition must therefore have at least 76 seats in order to have a majority.

Suppose that the public opinion polls just prior to the election revealed the following result: PvdA 36 seats; VVD 37; CDA 30; GroenLinks 10; D66 9; Lijst Pim Fortuyn 14; other parties 14. In this case, the VVD is the largest party and can therefore name the prime minister. Although D66 has lost a substantial number of seats, the three current coalition partners have given notice that they wish to continue with the Purple coalition. There are even talks between the parties concerning the continuance of the current coalition of PvdA, VVD and D66.

If the election for the Second Chamber was held under these circumstances, for which party would you cast your vote?

We hebben het zojuist al even gehad over de zetelverdeling in de Tweede Kamer. De

regeringscoalitie, dat wil zeggen de partijen die samen de regering vormen, bestaat op dit moment uit PvdA, VVD en D66, het zogenoemde Paarse Kabinet. Om een regeringscoalitie te kunnen vormen is het nodig om een meerderheid in de Tweede Kamer te hebben. De Kamer bestaat in totaal uit 150 zetels. Een coalitie heeft dus minstens 76 zetels nodig om de meerderheid te hebben.

Stel dat de opiniepeiling vlak voor de verkiezingen de volgende uitslag voorspellen:

PvdA 36 zetels; VVD 37; CDA 30; GroenLinks 10; D66 9; Lijst Pim Fortuyn 14;

overige partijen 14.

De VVD is met deze uitslag de grootste partij en kan daarom de premier leveren.

Hoewel D66 een stuk kleiner is geworden, hebben alle drie de regeringspartijen te kennen gegeven dat zij door willen gaan met de Paarse coalitie. Er zijn zelfs al gesprekken gaande over een eventuele voortzetting van de huidige coalitie tussen PvdA, VVD en D66.

Als er in deze situatie Tweede-Kamerverkiezingen zouden zijn, op welke partij zou u dan stemmen?

Showcard 6 presented listing response alternatives

1. I would not cast a vote in this situation	11	0.6	0.6
2. PvdA	351	18.4	19.0
3. CDA	456	23.9	24.7
4. VVD	284	14.9	15.4
5. D66	136	7.1	7.4
6. GroenLinks	217	11.4	11.8

17. Blanc	2	0.1	0.1
14. DK	57	3.0	MD
15. NA	6	0.3	MD
	1907	100	100

V0201 Party choice in the following situation: PvdA 33, VVD 43, CDA 36, GL 10, D66 8, LPF 9, other parties 11

All sorts of things can happen and the polls could show a completely different picture, for example the following: PvdA 33 seats; VVD 43; CDA 36; GroenLinks 10; D66 8; Lijst Pim Fortuyn 9; other parties 11.

In an interview the leader of the PvdA, Melkert, has announced that if his party loses more than 10 seats, this would show that the voters had lost trust in the party, and it would not enter a new government coalition. D66 has already announced that it will not enter a new coalition with the VVD without inclusion of the PvdA. This means that with these results the most likely coalition to emerge would be one between the CDA and the VVD.

If the election for the Second Chamber was held under these circumstances, for which party would you cast your vote?

Er kan uiteraard nog van alles gebeuren en de peilingen zouden ook een heel ander beeld kunnen laten zien, zoals bijvoorbeeld het volgende: PvdA 33 zetels; VVD 43; CDA 36; GroenLinks 10; D66 8; Lijst Pim Fortuyn 9; overige partijen 11.

In een interview heeft PvdA lijsttrekker Melkert laten weten dat zijn partij bij meer

dan 10 zetels verlies afziet van regeringsdeelname, omdat de kiezer dan laat weten het vertrouwen in de partij kwijt te zijn. D66 heeft al te kennen gegeven zonder de PvdA geen coalitie met de VVD aan te gaan. Dit houdt in dat met een uitslag zoals in deze peilingen waarschijnlijk een coalitie VVD-CDA gevormd zal worden. Als er in deze situatie Tweede-Kamerverkiezingen zouden zijn, op welke partij zou u dan stemmen?

Showcard 7 presented listing response alternatives

1.	I would not cast a vote in this situation	11	0.6	0.6
2.	PvdA	331	17.4	17.9
3.	CDA	511	26.8	27.7
4.	VVD	318	16.7	17.2
5.	D66	107	5.6	5.8
6.	GroenLinks	205	10.7	11.1
7.	SGP	26	1.4	1.4
8.	ChristenUnie (RPF, GPV)	73	3.8	4.0

15.	NA	6	0.3	MD
		1907	100	100

V0202 Party choice in the following situation: PvdA 31, VVD 37, CDA 33, GL 10, D66 8, LPF 20, other parties 11

Now suppose that the results of the polls yielded the following results: PvdA 31 seats; VVD 37; CDA 33; GroenLinks 10; D66 8; Lijst Pim Fortuyn 20; other parties 11.

Suppose that the CDA and the VVD desire to form a coalition. However, with these results they do not hold a majority. Pim Fortuyn has said that he and his Lijst Pim Fortuyn are willing to form a coalition with these two parties. CDA and VVD have reacted in a positive fashion.

If the election for the Second Chamber was held under these circumstances, for which party would you cast your vote?

Stelt u zich nu eens voor dat de peilingen er als volgt uitzien: PvdA 31 zetels; VVD 37; CDA 33; GroenLinks 10; D66 8; Lijst Pim Fortuyn 20; overige partijen 11.

Stel dat CDA en VVD samen willen regeren. Op dit moment hebben ze in de peilingen echter geen meerderheid. Pim Fortuyn heeft gezegd dat hij met zijn Lijst Pim Fortuyn wel met deze partijen een regering wil vormen. CDA en VVD hebben hierop positief gereageerd.

Als er in deze situatie Tweede-Kamerverkiezingen zouden zijn, op welke partij zou u dan stemmen?

Showcard 8 presented listing response alternatives

1.	I would not cast a vote in this situation	13	0.7	0.7
2.	PvdA	383	20.1	20.7
3.	CDA	429	22.5	23.2
4.	VVD	255	13.4	13.8

5.	D66	108	5.7	5.8
6.	GroenLinks	229	12.0	12.4
7.	SGP	27	1.4	1.5
8.	ChristenUnie (RPF, GPV)	74	3.9	4.0
9.	Leefbaar Nederland	16	0.8	0.9
10.	Lijst Pim Fortuyn	213	11.2	11.5
11.	SP	85	4.5	4.6
12.	Verenigde Senioren Partij	3	0.2	0.2
13.	Other	11	0.6	0.6
17.	Blanc	5	0.3	0.3
14.	DK	51	2.7	MD
15.	NA	5	0.3	MD
		1907	100	100

V0203 Party choice in the following situation: PvdA 39, VVD 27, CDA 34, GL 14, D66 7, LPF 13, other parties 16

The final possibility looks like this: PvdA 39 seats; VVD 27; CDA 34; GroenLinks 14; D66 7; Lijst Pim Fortuyn 13; other parties 16.

VVD and D66 are doing poorly in the polls. A continuance of the Purple coalition is not possible. On the other hand, the CDA and GroenLinks are doing well and have opened discussions with the PvdA about the formation of a coalition of PvdA-CDA-GroenLinks.

If the election for the Second Chamber was held under these circumstances, for which party would you cast your vote?

De laatste mogelijkheid ziet er als volgt uit: PvdA 39 zetels; VVD 27; CDA 34; GroenLinks 14; D66 7; Lijst Pim Fortuyn 13; overige partijen 16.

VVD en D66 doen het slecht in de peilingen. Voortzetting van de Paarse coalitie zit er dan ook niet in. Het CDA en GroenLinks doen het juist goed in de peilingen en samen met de PvdA spreken zij over de vorming van een coalitie PvdA-CDA-GroenLinks.

Als er in deze situatie Tweede-Kamerverkiezingen zouden zijn, op welke partij zou u dan stemmen?

15.	NA	5	0.3	MD

V0204 Euthanasia –position of CDA

Now I would like to address another problem. When a doctor ends the life of a person at the latter's request, this is called EUTHANASIA.

Not long ago the so-called 'Euthanasia-law' has been adopted. There are, however, still differences of opinion about the question whether a doctor should be allowed to end the life of a person at the latter's request. Some people think that euthanasia should be forbidden. Others feel that a doctor should always be allowed to end a life, if a patient makes that request. Of course, there are people whose opinion lie somewhere in between.

Suppose that the people (and parties) who think that euthanasia should be forbidden are at the beginning of this line (at number 1) and the people (and parties) who feel that a doctor should always be allowed to end a life upon a patient's request are at the end of the line (at number 7).

I will ask you first to place some political parties on the line. If you have no idea at all which position a party has, then please feel free to say so.

Where would you place the CDA on this line?

Dan wil ik het nu met u over een ander probleem hebben. Als een arts het leven van een patiënt op diens verzoek beëindigt noemen we dat EUTHANASIE.

Nog niet zo lang geleden is de zogenoemde Euthanasiewet aangenomen. Over de vraag of een arts het leven van een patiënt op diens verzoek zou mogen beëindigen bestaat echter nog altijd verschil van mening. Sommigen vinden dat euthanasie verboden zou moeten zijn. Anderen vinden dat een arts altijd euthanasie zou mogen toepassen als een patiënt daarom vraagt. Ten slotte zijn er ook mensen met een mening die daar tussenin ligt.

Stel: de mensen (en partijen) die vinden dat euthanasie verboden moet zijn staan aan het begin van de lijn (bij cijfer 1) en de mensen (en partijen) die vinden dat de arts altijd euthanasie mag toepassen als de patiënt daarom vraagt staan aan het einde van de lijn (bij nummer 7).

Ik ga u eerst vragen om politieke partijen te plaatsen op deze lijn. Als u helemaal niet weet welk standpunt een partij heeft, zeg het dan gerust.

Waar zou u het CDA op de lijn plaatsen?

Showcard 10 A presented, listing response alternatives

V0210 Income differences –position of CDA

And now I would like to discuss another problem with you.

Some people and parties think that the DIFFERENCES IN INCOME in our country should be increased (at number 1). Others think that these differences should be decreased (at number 7). Of course, there are also people whose opinion is somewhere in between.

I will ask you first to place some political parties on the line. If you have no idea at all which position a party has, then please feel free to say so.

Where would you place the CDA on this line?

Dan wil ik het nu met u over een ander probleem hebben.

Sommige mensen en partijen vinden dat de VERSCHILLEN IN INKOMENS in ons land groter moeten worden (bij cijfer 1). Anderen vinden dat deze verschillen kleiner moeten worden (bij cijfer 7). Natuurlijk zijn er ook mensen met een mening die hier ergens tussenin ligt.

Ik ga u eerst vragen om politieke partijen te plaatsen op deze lijn. Als u helemaal niet weet welk standpunt een partij heeft, zeg het dan gerust.

Waar zou u het CDA op de lijn plaatsen?

V0216 Asylum seekers –position of CDA

Now I would like to talk with you about another problem. Allowing ASYLUM SEEKERS to enter the Netherlands has frequently been in the news during the last few years. Some people think that the Netherlands should allow more asylum seekers than the government currently does. Other people think that the Netherlands should send asylum seekers who are already staying here back to their country of origin. Of course, there are also people whose opinion lies somewhere in between.

At the beginning of this line are the people (and parties) who think that the Netherlands should allow more asylum seekers to enter (at number 1); at the end of the line are the people (and parties) who think that the Netherlands should send back as many asylum seekers as possible (at number 7).

I will ask you first to place some political parties on the line. If you have no idea at all which position a party has, then please feel free to say so.

Where would you place CDA on this line?

Dan wil ik het nu met u over een ander probleem hebben.

De toelating van ASIELZOEKERS is de afgelopen jaren vaak in het nieuws geweest. Sommige mensen vinden dat Nederland meer asielzoekers zou moeten toelaten dan nu het geval is. Andere mensen vinden dat Nederland de asielzoekers die hier al zijn, zoveel mogelijk zou moeten terugsturen naar hun land van herkomst. Natuurlijk zijn er ook weer mensen met een mening die daar tussen in ligt.

Aan het begin van de lijn staan nu personen (en partijen) die vinden dat Nederland meer asielzoekers moet toelaten (dus bij cijfer 1); aan het einde van de lijn staan de personen (en partijen) die vinden dat Nederland zoveel mogelijk asielzoekers moet terugsturen (dus bij cijfer 7).

Ik ga u eerst vragen om politieke partijen te plaatsen op deze lijn. Als u helemaal niet weet welk standpunt een partij heeft, zeg het dan gerust.

Waar zou u het CDA op deze lijn plaatsen?

V0222 Crime –position of CDA

Now I would like to ask you a question about another problem. People think differently about the way the government fights CRIME and tries to preserve law and order. Some people think that the government is not tough enough, while other people think that the government should be tougher on crime.

At the beginning of this line are the people (and parties) who think that the government is acting too tough on crime (at number 1); at the end of this line are the people (and parties) who think that the government should act tougher on crime (at number 7). I am going to ask you to place the political parties on this line. If you do not know which point of view a party has, feel free to say so.

Where would you place the CDA on this line?

Dan wil ik het nu met u over een ander probleem hebben. Over de wijze waarop de overheid optreedt tegen CRIMINALITEIT en probeert de openbare orde te handhaven wordt verschillend gedacht. Sommigen vinden dat de overheid te hard optreedt, terwijl anderen vinden dat de overheid harder zou moeten optreden.

Aan het begin van de lijn staan nu personen (en partijen) die vinden dat de overheid te hard optreedt (dus bij cijfer 1). Aan het einde van de lijn staan de personen (en partijen) die vinden dat de overheid harder zou moeten optreden (dus bij cijfer 7). Ik ga u eerst vragen om politieke partijen te plaatsen op deze lijn. Als u helemaal niet weet welk standpunt een partij heeft, zeg het dan gerust.

V0280 Sympathy score: CDA

There are many political parties in our country. I would like to know from you how sympathetic you find these parties. You can give each party a score between 0 and 100. The more sympathetic you find a party, the higher the score you give. A score of 50 means that you find a party neither sympathetic nor unsympathetic. If you don't know a party, please feel free to say so.
Which score would you give the CDA?

Er zijn veel politieke partijen in ons land. Ik zou graag van u weten hoe sympathiek u deze partijen vindt. U kunt iedere partij hiervoor punten geven tussen de 0 en de 100. Hoe sympathieker u een partij vindt, hoe meer punten u die partij geeft. 50 betekent dat u die partij niet sympathiek, maar ook niet onsympathiek vindt. Als u een partij niet kent, zegt u het dan gerust.
Hoeveel punten zou u het CDA geven?

Parties were presented in random order

Showcard 12 presented, listing a horizontal line with labels at equal distance, 0 . . . 100. Position 0 is additionally labeled as 'very unsympathetic', position 50 as 'neither sympathetic nor unsympathetic', and position 100 as 'very sympathetic'.

V0290 Sympathy score: Wim Kok

I would also like to know how sympathetic you find the following politicians. If you don't know a politician, please feel free to say so.

First Wim Kok. Which score would you give him?

Ik zou ook graag van u weten hoe sympathiek u de volgende politici vindt. Als u een politicus niet kent, zegt u het dan gerust.

Allereerst nemen we Wim Kok. Hoeveel punten zou u hem geven?

Politicians were presented in random order

V0350 Coalition preference 2002 (pre election)
Refer to 4.3.4 for information of this variable.

V0351 Does it matter for you personally which parties are member of the government coalition?
Does it make much difference to you, a little difference, or no difference at all which parties become part of the government?

Maakt het voor u veel, weinig of niets uit welke partijen in de regering komen?

1.	much difference	1382	72.5	73.0
----	-----------------	------	------	------

2.	little difference	389	20.4	20.5
3.	no difference at all	122	6.4	6.4
4.	DK	14	0.7	MD
		1907	100	100

V0352 Does it matter for the country which parties are member of the government coalition?

And do you think it makes much difference for the country which government coalition is formed. Could you respond according to this scale? An 1 indicates “it does not make any difference at all” and a 7 indicates “it makes a lot of difference”.

En denkt u dat het voor het land veel uitmaakt welke regering er komt?

Kunt u dat aan de hand van deze schaal aangeven? Een 1 betekent ‘maakt helemaal geen verschil’ en een 7 betekent ‘maakt heel veel verschil’.

		1907	100	100

V0353 Chance of coalition PvdA-D66-VVD

Ignoring your own personal preference, what do you think the chances are that the following coalitions will be formed? On showcard 15 1 indicates that according to you there is absolutely no chance that such a coalition will be formed, and 10 indicates that according to you this coalition will definitely be formed. I will mention a number of possibilities. A coalition of PvdA-D66-VVD? What is the chance that such a coalition will be formed?

Los van wat uw eigen voorkeur is, wat zijn dan volgens u de kansen voor de vorming van verschillende coalities? Op dit toonblad 15 betekent een 1 dat er volgens u geen enkele kans is op zo'n regeringscoalitie, en een 10 dat u er zeker van bent dat die regeringscoalitie na de verkiezingen zal worden gevormd. Ik noem u nu een aantal mogelijkheden. Een coalitie van PvdA-D66-VVD? Hoe groot is volgens u de kans dat deze coalitie wordt gevormd?

V0361 Discussed politics at home when adolescent

Now I would like to ask you a few questions about the period when you were 10 to 16 years old. At that time, were political topics discussed often, fairly often, not often, or not at all in your home?

Dan wil ik u nu enkele vragen stellen over de periode waarin u 10 tot 16 jaar was. Werd er toen bij u thuis veel, tamelijk veel, weinig of niet over politieke onderwerpen gesproken?

1.	often	252	13.2	13.3
2.	fairly often	460	24.1	24.3
3.	not often	797	41.8	42.2

V0416 Composition of household –who answers the questions

1.	respondent takes over the computer	1052	55.2
2.	respondent doesn't take over the computer	855	44.8
		1907	100

V0417 Number of household members

Now I would like to ask you some questions about yourself, your household and the members of your family.

Including yourself, how many persons belong to your household? (Children who are living elsewhere are not considered members of the household.)

Dan zou ik u nu wat vragen willen stellen met betrekking tot uzelf, uw huishouden en uw familieleden. Het gaat om alle personen die in deze huishouding wonen, dus ook eventueel inwonende personen.

Uzelf meegerekend, uit hoeveel personen bestaat het huishouden waartoe u behoort? (Kinderen die elders op kamers wonen niet tot het huishouden rekenen.)

1.	1 person (myself)	323	16.9	17.0
2.	2	716	37.5	37.6
3.	3	286	15.0	15.0
4.	4	373	19.6	19.6
5.	5	160	8.4	8.4
6.	6	33	1.7	1.7
7.	7	8	0.4	0.4
9.	9 or more	5	0.3	0.3
10.	NA	3	0.2	MD
		1907	100	100

V0418 Composition of household

This index is constructed from variables V0417 and V0419 to V0445. See 4.3.3 for more information on this variable.

1.	single person household	329	17.3	17.3
2.	single person, other(s)	9	0.5	0.5
3.	couple, no children	666	34.9	34.9

V0464 Current occupational status of respondent

The next questions are about your profession.

Could you indicate what your daily activities are or which situation applies to you?

For volunteer work, answer 2 if you have previously had paid employment or 3 if you have never had paid employment.

De volgende vragen gaan over uw beroep.

Kunt u aangeven wat u momenteel doet of welke situatie op u van toepassing is?

Vrijwilligers, niet betaald werk is 'ik heb betaald werk verricht' (2) of 'ik heb nooit betaald werk verricht' (3).

1.	I am currently employed	1147	60.1	60.1
2.	I was employed but not anymore	709	37.2	37.2
3.	I have never been employed	51	2.7	2.7
		1907	100	100

V0465 Sector in which respondent is currently employed

Are you working in public service, on a payroll, self-employed, or what? If you have more than one occupation, than answer these questions for the position in which you are employed for the most hours per week.

Temporary jobs via a temporary organization are coded as 'employed elsewhere'.

Bent u werkzaam in overheidsdienst, in loondienst, zelfstandig werkzaam of op andere wijze? Indien meer dan 1 werkkring, dan gaan de vragen over de werkkring met de meeste uren per week.

Banen via het uitzendbureau is 'elders in loondienst'.

V0557 Total net income per household

On this showcard are some income groups. These relate to the total net income of all members of the family together for a year, after taxes and such. Extra earnings or income from children living at home must be included: child payments, social and welfare payments, old age benefits and pensions also count as income. Could you indicate what the total net income of your household is?

This question is very important for this research. NIPO can guarantee you that this information will be kept STRICTLY CONFIDENTIAL. However, for scientific research, in which the information of individuals is combined into groups, the responses to this question are extremely important.

Op dit toonblad staan enige inkomensgroepen. Het gaat hier om het totale netto inkomen van alle gezinsleden bij elkaar per jaar, na aftrek van belastingen en dergelijke. Eventuele bijverdiensten en de inkomsten van meeverdienende kinderen moet u dus meetellen; kinderbijslag, sociale uitkeringen, AOW en pensioen gelden ook als inkomen. Kunt u aangeven in welke categorie het jaarlijkse inkomen van uw huishouden valt?

Deze vraag is voor het onderzoek erg belangrijk. Het NIPO kan u verzekeren dat dit gegeven natuurlijk STRIKT GEHEIM blijft. Maar voor wetenschappelijke verwerking van de gegevens van alle ondervraagden bij elkaar, is het voor dit onderzoek een uitermate belangrijk gegeven.

V0561 Next wave: Questionnaire on paper

Would you be willing to answer the questions next time without me being present?
The questions may be answered by means of a written questionnaire, via a diskette from a 'normal' PC (i.e. not an Apple), or online via Internet.

Zou u eventueel bereid zijn om de vragen een volgende keer zelf te beantwoorden, zonder dat ik daar bij ben? Het beantwoorden kan dan via een papieren vragenlijst, via een diskette die in elke 'gewone' PC kan, niet in een Apple helaas, of online via het Internet.

Questionnaire on paper.
Papieren vragenlijst.

V0583 Resignation Kok Cabinet: Srebrenica (responsibility of the Netherlands)

First something about the fall of the Cabinet. As you possibly know, the Kok Cabinet fell a few weeks before the election, that is it submitted its resignation to the Queen. Do you still know why it was that the Cabinet fell? Could you express that in your own words?

Eerst de val van het kabinet. Zoals u wellicht weet, is het kabinet-Kok enkele weken voor de verkiezingen gevallen. Dat wil zeggen dat het zijn ontslag heeft aangeboden aan de Koningin. Weet u ook nog waarover het kabinet gevallen is? Kunt u dat in uw eigen woorden aangeven?

Srebrenica (de verantwoordelijkheid hiervoor / de rol die Nederland hierin heeft gespeeld)

V0599 Campaign-stop after murder of Pim Fortuyn
 And then the death of Pim Fortuyn.
 Immediately after the assassination of Fortuyn the political parties ceased all campaign activities. What was your opinion on this? Did you feel it was necessary to stop the campaign immediately or was it not necessary to stop the campaign immediately?

En dan de dood van Pim Fortuyn.

Direct na de moordaanslag op Fortuyn hebben alle politieke partijen hun verkiezingscampagne stopgezet. Wat vond u daarvan? Vond u het nodig dat de campagne direct werd stopgezet of vond u het onnodig dat de campagne direct werd stopgezet?

1.	immediate campaign-stop was necessary	1271	66.6	81.5

V0600 Restart campaign after several days
 Some people felt that the campaign could be resumed after a few days. Others were of the opinion that no more campaign activities should be carried out before the election on May 15. What do you think? Is it your opinion that it was allowed to resume the campaign or that it was not allowed to resume the campaign?

Volgens sommigen kon de campagne na enkele dagen wel worden hervat. Anderen waren van mening dat tot de verkiezingen van 15 mei helemaal geen campagne meer gevoerd kon worden. Wat vindt u? Bent u van mening dat de campagne hervat mocht worden of dat de campagne niet hervat mocht worden?

V0601 Guilty of murder of Pim Fortuyn: Political parties and politicians

Immediately after the attack on Fortuyn, a suspect was arrested. According to some people he was not alone responsible for this action, but others were also responsible for the death of Fortuyn. Some felt that other political parties and politicians were guilty of the death of Fortuyn. What is your opinion? Do you feel that political parties or politicians have guilt of the death, or is this in your opinion not the case?

Direct na de aanslag op Fortuyn werd een verdachte opgepakt. Volgens sommige mensen was echter niet alleen hij verantwoordelijk voor de dood van Fortuyn, maar waren ook anderen dat. Volgens sommigen hadden andere politieke partijen en ook politici schuld aan de dood van Fortuyn. Wat is uw mening daarover? Vindt u dat politieke partijen of politici schuld hebben aan zijn dood, of is dat volgens u niet het geval?

1.	political parties and politicians are guilty	207	10.9	13.6

V0620 Read campaign news in newspaper

Now I would like to ask you some questions about the campaign preceding the election of the Second Chamber on May 15. If there was news about the election campaign in the newspaper, how often did you read such news?

Dan volgen nu enkele vragen over de verkiezingscampagne en de Kamerverkiezingen van 15 mei. Als er in de krant nieuws over de verkiezingscampagne stond, hoe vaak las u dat dan?

Showcard 1 presented, listing response alternatives

1.	(nearly) always	452	23.7	28.7
2.	often	547	28.7	34.8
3.	now and then	419	22.0	26.6
4.	seldom or never	90	4.7	5.7
5.	does not read paper	66	3.5	4.2
	PA	333	17.5	MD
		1907	100	100

V0621 Seen vote-appeal by Postbus 51

Did you see the television spots from Postbus 51 that were broadcast during the campaign in which people were urged to vote?

Heeft u gedurende de campagne op televisiespotjes van Postbus 51 gezien, waarin werd opgeroepen om te gaan stemmen?

1.	yes	1147	60.1	74.8
2.	no	356	18.7	23.2
3.	do not have TV-set, never watch television	31	1.6	2.0
4.	DK	40	2.1	MD
	PA	333	17.5	MD
		1907	100	100

V0622 Has seen electoral debates

In the weeks prior to the election, debates were held on television in which the leaders of the political parties participated. Did you watch one of these debates entirely, for the greater part or only a small part?
(if at least one debate was seen, use code 1)

In de weken voorafgaand aan de verkiezingen werden op de televisie debatten gehouden waaraan de lijsttrekkers van politieke partijen meededen. Heeft u een van deze debatten geheel of grotendeels of voor een klein deel gezien?
(als minstens 1 debat geheel gezien, dan code 1 intikken)

Routing, if V0621 is not code 3

1.	yes, entirely	342	17.9	22.2
2.	yes, for the greater part	506	26.5	32.8
3.	yes, only for a small part	503	26.4	32.6
4.	no	191	10.0	12.4
5.	DK	1	0.1	MD
	INAP/PA	364	19.1	MD
		1907	100	100

V0623 Campaign activity: Display window poster or campaign board

During the election campaign all kinds of activities are undertaken. Here is a list of

such activities. Would you tell which of the following activities you have undertaken during the most recent campaign?

Display window poster or campaign board

Tijdens de verkiezingscampagne worden allerlei activiteiten ondernomen. Ik heb hier een lijst van zulke activiteiten. Wilt u zeggen welke van de volgende dingen u heeft gedaan in de afgelopen campagne?

Ophangen raambiljet of verkiezingsbord

V0677 Party choice –when decided

When did you decide to vote for (party mentioned in V0647)? Was this on ELECTION DAY, during the last DAYS before the election, during the last WEEKS before the election, a few MONTHS before the election, or did you know even LONGER beforehand which party you would vote for?

Wanneer hebt u besloten op (partij genoemd bij V0647) te stemmen? Was dat op de DAG van de verkiezingen zelf, de laatste DAGEN voor de verkiezingen, de laatste WEKEN voor de verkiezingen, een paar MAANDEN tevoren of wist u al LANGER van tevoren hoe u zou gaan stemmen?

V0696 Place where respondent prefers to vote

In the Netherlands one generally votes at a polling station near one's place of residence. If you want to vote somewhere else, you must obtain a voter identification pass. If you had a choice from the following possibilities, where would you choose to vote? Would that be close to your residence, close to your work, at a train or busstation, at the shopping centre where you shop, or somewhere else?

In Nederland stemt u normaal gesproken in een stembureau dat dicht bij uw woning is. Als u ergens anders wilt stemmen, moet u een kiezerspas aanvragen. Als u nu de keuze zou hebben uit de volgende mogelijkheden, waar zou u dan gaan stemmen? Zou u dat dicht bij uw woning willen doen, dicht bij uw werk, op een bus- of treinstation, bij de winkels waar u boodschappen doet, of nog ergens anders?

Showcard 5 presented, listing response alternatives

1.	close to residence	1422	74.6	91.3
2.	close to work	71	3.7	4.6

2.	voted at other polling station with vote identification pass	11	0.6	0.8
3.	DK	1	0.1	MD
	INAP/PA	494	25.9	MD
		1907	100	100

V0699 Importance supervision voting in general

When you cast your vote at an election, the officials at the polling station insure that you can do so undisturbed and completely by yourself. It would also be possible to place voting machines in publicly accessible areas such as stations, post offices, shopping centres, or even on the street, but without officials who continually supervise the site. Some people think that supervision is not that important, whereas others consider this to be very important. What do you think? Could you indicate how important supervision is for you in such a situation?

Als u bij de verkiezingen uw stem uitbrengt, zorgen de leden van het stembureau ervoor dat u dat ongestoord en helemaal zelf kunt doen. Het is ook mogelijk om stemmachines te plaatsen in openbaar toegankelijke ruimten zoals stations,

postkantoren, en winkelcentra, of zelfs op straat, zonder dat leden van een stembureau steeds toezicht houden. Sommige mensen vinden toezicht niet zo belangrijk, terwijl anderen toezicht juist wel belangrijk vinden. Wat vindt u? Kunt u aangeven hoe zwaar voor u in zo'n situatie toezicht zou wegen?

Showcard 6 presented, listing response alternatives

1.	1 supervision is not that important	89	4.7	5.7
2.	2	91	4.8	5.8
3.	3	154	8.1	9.9
4.	4	347	18.2	22.2

V0779 Did not vote –when decided

When did it become clear that you would not vote? Was that on ELECTION DAY, during the last DAYS before the election, the last WEEKS before the election, a few MONTHS beforehand or did you know even LONGER beforehand that you would not vote?

Wanneer werd duidelijk dat u niet zou gaan stemmen? Was dat op de DAG van de verkiezingen zelf, de laatste DAGEN voor de verkiezingen, de laatste WEKEN voor de verkiezingen, een paar MAANDEN van tevoren of wist u al LANGER dat u niet zou gaan stemmen?

V0781 Influence on turnout: Compulsory voting

Recently there has been discussion about various ways by which to make voting more attractive and to increase turnout at elections. I am going to mention some proposals to you. What do you think of them? Do you think the measure will work very badly or very well in making voting more attractive and raising turnout or maybe something somewhere in between? Could you indicate with the help of this

showcard, on which 0 stands for 'has a bad influence on turnout' and 10 for 'has a good influence on turnout.'
 Making voting compulsory

Er wordt de laatste tijd gesproken over verschillende manieren om het stemmen aantrekkelijker te maken en de opkomst bij verkiezingen te verhogen. Enkele van die maatregelen noem ik nu op. Wat denkt u ervan? Zullen deze maatregelen heel slecht of heel goed werken om stemmen aantrekkelijker te maken en de opkomst te verhogen, of misschien iets daar tussenin? Kunt u dat aangeven met behulp van deze kaart, waarop 0 staat voor 'werkt heel slecht voor opkomst' en 10 voor 'werkt heel goed voor opkomst'?
 Er wordt een opkomstplicht ingevoerd

V0790 Number of seats after election: PvdA

Do you know how many seats the various parties obtained at the recent election? I will mention a number of parties and ask you how many seats they have in the new Second Chamber. If you do not know precisely, then you may simply give an estimate of the number.

Weet u hoeveel zetels de verschillende partijen hebben gekregen bij de afgelopen verkiezingen? Ik noem u een aantal partijen, en vraag u hoeveel zetels ze in de nieuwe Tweede Kamer hebben. Als u het niet precies weet, dan kunt u gewoon een schatting geven van het aantal.

V0848 Sympathy score: CDA

There are many political parties in our country. I would like to know from you again how sympathetic you find these parties. You can give each party a score between 0 and 100. The more sympathetic you find a party, the higher the score you give. A score of 50 means that you find a party neither sympathetic nor unsympathetic. If you don't know a party, please feel free to say so.

Er zijn veel politieke partijen in ons land. Ik zou graag nogmaals van u weten hoe sympathiek u deze partijen vindt. U kunt iedere partij hiervoor punten geven tussen de 0 en de 100. Hoe sympathieker u een partij vindt, hoe meer punten u die partij geeft. 50 betekent dat u die partij niet sympathiek, maar ook niet onsympathiek vindt. Als u een partij niet kent, zegt u het dan gerust.

*Parties were presented in random order**Showcard 11 presented, listing a horizontal line with labels at equal distance,**0...100. Position 0 is additionally labeled as 'very unsympathetic', position 50 as 'neither sympathetic nor unsympathetic', and position 100 as 'very sympathetic'.*

0	very unsympathetic	9	0.5	0.6

V0869 Nuclear plants –position of CDA

Now I would like to ask you some questions about political issues that are regularly in the news. As you may know, some people fear that within the foreseeable future a shortage of energy will occur in the world. One means of supplying this shortage is to build NUCLEAR POWER PLANTS. Some people therefore believe that the Netherlands should quickly increase the number of nuclear power plants. Others, on the other hand, consider the dangers too great and think that no nuclear power plants should be built at all.

At the beginning of this line are people and parties who think that additional nuclear plants should be built in the Netherlands (at number 1); at the end of this line are people and parties who think that no nuclear plants should be built at all (at number 7). I will ask you first to place some political parties on the line. If you have no idea at all which position a party has, then please feel free to say so.

Where would you place the CDA on this line?

Nu een paar vragen over politieke zaken die regelmatig in het nieuws zijn. Zoals u misschien weet bestaat bij sommige mensen en partijen de vrees dat er binnen afzienbare tijd een tekort aan energie in de wereld zal ontstaan. Een manier om in dit tekort te kunnen voorzien is het bouwen van KERNCENTRALES. Sommigen vinden dat om die reden Nederland snel moet werken aan de uitbreiding van het aantal kerncentrales, anderen daarentegen vinden de gevaren te groot en vinden dat er in het geheel geen kerncentrales moeten worden gebouwd.

Aan het begin van de lijn staan personen en partijen die vinden dat in Nederland kerncentrales erbij moeten worden gebouwd (bij 1). Aan het einde van de lijn staan personen en partijen die vinden dat er in het geheel geen kerncentrales moeten worden gebouwd (bij 7).

Ik ga u eerst vragen om politieke partijen te plaatsen op deze lijn. Als u helemaal niet weet welk standpunt een partij heeft, zegt u het dan gerust.

Waar zou u het CDA op de lijn plaatsen?

V0876 Ethnic minorities –position of CDA

There is disagreement in the Netherlands about foreigners and ETHNIC MINORITIES. Some people and parties think that these people should be able to live in the Netherlands while preserving all customs of their own culture. Others think that these people, if they stay in the Netherlands, should completely adjust themselves to Dutch culture. Of course, there are also people whose opinion is somewhere in between. At the beginning of this line are the people (and parties) who think that foreigners and ethnic minorities should be able to live in the Netherlands while preserving all customs of their own culture (at number 1); at the end of the line are the people (and parties) who think that these people should fully adjust themselves to Dutch culture (at number 7).
Where would you place the CDA at this line?

In Nederland wordt verschillend gedacht over allochtonen en ETNISCHE MINDERHEDEN. Sommige mensen en partijen vinden dat ze in Nederland moeten kunnen leven met behoud van alle gewoonten van de eigen cultuur. Anderen vinden dat zij zich, als zij in Nederland blijven, volledig moeten aanpassen aan de Nederlandse cultuur. Natuurlijk zijn er ook mensen die een mening hebben die daar tussen in ligt.

Aan het begin van de lijn staan nu personen (en partijen) die vinden dat allochtonen en etnische minderheden in Nederland moeten kunnen leven met behoud van alle gewoonten van de eigen cultuur (dus bij cijfer 1); aan het einde van de lijn staan de personen (en partijen) die vinden dat ze zich volledig moeten aanpassen aan de Nederlandse cultuur (dus bij cijfer 7).

Waar zou u het CDA op deze lijn plaatsen?

V0883 European unification –position of CDA

EUROPEAN UNIFICATION is well under way. The countries of the European Union have decided to work more and more closely together. However, not everybody holds the same view about it. Some people and parties think that European unification should go further. Others think that European unification has already gone too far. Suppose the people and parties who think that European unification should go further are at the beginning of this line (at number 1) and the people and parties who think European unification has already gone too far are at the end of the line (at number 7).

Where would you place the CDA on this line?

De EUROPESE EENWORDING is in volle gang. De landen van de Europese Unie hebben besloten om steeds nauwer met elkaar te gaan samenwerken. Maar niet iedereen denkt hierover hetzelfde.

Sommige mensen en partijen vinden dat de Europese eenwording nog verder zou moeten gaan. Anderen vinden dat de Europese eenwording al te ver is gegaan. Stel dat de mensen en partijen die vinden dat de Europese eenwording nog verder zou moeten gaan aan het begin van de lijn staan (bij cijfer 1) en dat de mensen en partijen die vinden dat de eenwording al te ver is gegaan aan het einde van de lijn staan (bij cijfer 7).

Waar zou u het CDA op deze lijn plaatsen?

V0899 Which aspect should politicians emphasize?

In their relationship with voters politicians can place various emphasizes. On this showcard two aspects of their work are indicated. Which aspect do you feel that politicians should emphasize? Which of the two do you find most important?

In hun relatie tot kiezers kunnen politici op verschillende aspecten de nadruk leggen. Op dit toonblad staan twee van deze aspecten. Op welk aspect zouden volgens u

politici de meeste nadruk dienen te leggen? Welk van de twee vindt u het belangrijkste?

V0900 Faith in Jan Peter Balkenende as Prime Minister

I will now mention to you the names of possible candidates for the position of Prime Minister. Could you indicate how much faith you would have in each person as Prime Minister? How much faith do you have in Jan Peter Balkenende as Prime Minister? Please mention the number that applies to the candidate. If you do not know the candidate, do not hesitate to say so.

Ik noem nu telkens de naam van een mogelijke kandidaat voor de post van minister-president. Wilt u aangeven hoeveel vertrouwen u in deze persoon zou hebben als minister-president? Hoeveel vertrouwen heeft u in Jan Peter Balkenende als minister-president? Noemt u maar het cijfer dat van toepassing is. Als u een kandidaat niet kent, zegt u het dan gerust.

V0930 Most Dutch parties look alike

Most Dutch parties look so much alike that it makes little difference which parties govern and which do not.

De meeste Nederlandse partijen lijken zo op elkaar dat het weinig uitmaakt welke partijen in de regering zitten en welke niet.

Statement was presented in random order with statements from V0922 to V0924 and V0926 to V0928.

V0932 Probability of future vote for CDA

Some people are completely certain that they will always vote for the same party. Others reconsider each time to which party they will give their vote. I will mention a number of parties. Would you indicate for each party how probable it is that you will ever vote for that party? Tell me the number that applies to the party. If you do not know a party or if you do not know the answer, do not hesitate to say so and we will continue with the next party.
The CDA?

Voor sommigen is het heel zeker dat zij altijd op dezelfde partij zullen stemmen. Anderen bekijken elke keer opnieuw aan welke partij zij hun stem geven. Ik noem u een aantal partijen. Wilt u voor elke partij aangeven hoe waarschijnlijk het is dat u er ooit op zult stemmen? Noemt u maar het cijfer dat van toepassing is. Als u een partij niet kent of het niet weet, zeg het gerust, we gaan dan verder met de volgende partij.
Het CDA?

V0960 Should there be confessional parties?

Now I would like to ask you some questions about politics and religion.

Do you think that political parties should be completely separated from religion, or do you think that there should also be confessional parties, that is parties based on

religion?

Nu wil ik u enkele vragen stellen over politiek en godsdienst.

Vindt u dat politieke partijen geheel los moeten staan van godsdienst, of bent u van mening dat er ook confessionele partijen moeten zijn, d.w.z. politieke partijen die gebaseerd zijn op godsdienst?

1.	political parties should be secular	675	35.4	44.0
2.	there should also be confessional political parties	858	45.0	56.0
3.	DK	37	1.9	MD
4.	NA	4	0.2	MD
	PA	333	17.5	MD
		1907	100	100

V0961 Should there be confessional trade unions?

And trade unions? Do you think that trade unions should be completely separated from religion, or do you think that there should also be confessional trade unions?

En vakbonden? Vindt u dat vakbonden geheel los moeten staan van godsdienst, of bent u van mening dat er ook confessionele vakbonden moeten zijn?

1.	trade unions should be secular	929	48.7	60.7
2.	there should also be confessional trade unions	602	31.6	39.3
3.	DK	39	2.0	MD
4.	NA	4	0.2	MD
	PA	333	17.5	MD
		1907	100	100

V0962 Should there be confessional schools?

Do you think that schools should be completely separated from religion, or do you think that there should also be confessional schools, that is schools based on religion?

Vindt u dat scholen geheel los moeten staan van godsdienst, of bent u van mening dat er ook confessionele scholen moeten zijn, d.w.z. scholen die gebaseerd zijn op godsdienst?

1.	schools should be secular	547	28.7	35.5

		1907	100	100

V0964 Religion good guide in politics

Do you fully agree, agree, disagree or fully disagree with the following statement?
Religion is a good guide in politics.

Bent u het met de volgende uitspraak helemaal eens, mee eens, mee oneens of helemaal mee oneens?
Het geloof is voor de politiek een goede wegwijzer.

V0966 Progressive-conservative –position of respondent

Political opinions are often designated as PROGRESSIVE or CONSERVATIVE.
When you think of your own political opinions, where would you place yourself on this line? Indicate the number that would apply to you.

Van politieke opvattingen wordt vaak gezegd dat zij PROGRESSIEF of CONSERVATIEF zijn. Wanneer u denkt aan uw eigen politieke opvattingen, waar zou u dan zichzelf op deze lijn plaatsen? Noemt u maar het cijfer dat op u van toepassing is.

V0977 Party choice if elections were held tomorrow

We have discussed the parliamentary elections of May 15 at length. But suppose that for some reason there were suddenly new elections tomorrow. What would you do then? For which party would you cast your vote?

We hebben het al uitgebreid gehad over de Tweede-Kamerverkiezingen van 15 mei. Maar stel nu eens dat er morgen om de een of andere reden ineens nieuwe Kamerverkiezingen zouden zijn. Wat zou u dan doen? Op welke partij zou u dan gaan stemmen?

1.	I would not cast a vote	15	0.8	1.0
2.	PvdA	251	13.2	16.9
3.	CDA	439	23.0	29.5
4.	VVD	196	10.3	13.2
5.	D66	90	4.7	6.1
6.	GroenLinks	130	6.8	8.7
7.	SGP	24	1.3	1.6
8.	ChristenUnie (RPF, GPV)	56	2.9	3.8
9.	Leefbaar Nederland	11	0.6	0.7
10.	Lijst Pim Fortuyn	137	7.2	9.2
11.	SP	129	6.8	8.7

V0980	Problems with another survey?			
	At the next parliamentary elections NIPO, at the request of a number of Dutch universities, would like to have one last short conversation with all those who have participated in this research. If you have no objection someone will contact you at that time for one more short conversation.			
	Bij de volgende Tweede-Kamerverkiezingen wil het NIPO in opdracht van een aantal Nederlandse universiteiten graag voor de laatste keer een kort gesprek voeren met iedereen die aan dit onderzoek heeft meegedaan. Als u er geen bezwaar tegen heeft zal tegen die tijd nog één keer iemand contact met u opnemen voor dit korte gesprek.

X0001	Resignation Balkenende Cabinet: Quarrel between two ministers				
	After the elections for the Second Chamber of Parliament on May 15, 2002, a new government was formed consisting of CDA, VVD and LPF. However, this Cabinet-Balkenende fell in October, after less than three months in office. Do you know because of what or why the Cabinet-Balkenende fell? Could you express this in your own words?				
	Quarrel between two government ministers				
	Na de Tweede-Kamerverkiezingen van 15 mei 2002 vormden CDA, VVD en LPF de nieuwe regering. Dit kabinet-Balkenende viel echter al weer in oktober, na minder dan drie maanden te hebben geregeerd. Weet u nog waardoor of waarom dit kabinet-Balkenende gevallen is? Kunt u dat in uw eigen woorden aangeven?

X0019 Guilty of resignation Balkenende Cabinet: Gerrit Zalm

According to some people VVD-leader Gerrit Zalm was the person most guilty in the fall of the Balkenende Cabinet. Others feel that the Prime Minister and leader of the CDA, Jan Peter Balkenende, was most to blame. And still others feel the guilt lies primarily with various persons from the Lijst Pim Fortuyn. What do you think? Who is in your opinion most to blame for the resignation of the Balkenende Cabinet?

Volgens sommigen was de val van het kabinet-Balkende vooral de schuld van de VVD-leider Gerrit Zalm. Anderen menen dat de val vooral aan het optreden van minister-president en CDA-leider Jan Peter Balkenende te wijten is. En weer anderen zijn van mening dat vooral verschillende personen van de Lijst Pim Fortuyn schuldig waren aan de val van het kabinet. Wat vindt u? Wie heeft volgens u de schuld aan de val van het kabinet-Balkenende?

X0123 Satisfaction with the way democracy works

Now I would like to ask a question about the functioning of democracy. Are you in general very satisfied, somewhat satisfied, not very satisfied, or not at all satisfied about the way democracy functions in the Netherlands?

Nu wil ik een vraag stellen over het functioneren van de democratie. Bent u over het algemeen genomen zeer tevreden, tamelijk tevreden, niet erg tevreden of helemaal niet tevreden met de wijze waarop de democratie in Nederland functioneert?

F	1.	very satisfied	97	7.6	7.7

X0124 Euthanasia –position of respondent

Now some questions about political affairs that are frequently in the news. When a doctor ends the life of a person at the latter's request, this is called EUTHANASIA. Some people think that euthanasia should be forbidden by law. Others feel that a

doctor should always be allowed to end a life, if the patient makes that request. Of course, there are people whose opinions lie somewhere in between. Suppose that those who feel that euthanasia should be forbidden are at the beginning of this line (at number 1) and the people who feel that a doctor should always be able to administer euthanasia at the request of the patient are at the other end of the line (at number 7)

Where would you place yourself on this line?

Dan wil ik het nu met u over enkele maatschappelijke en politieke problemen hebben. Als een arts het leven van een patiënt op diens verzoek beëindigt noemen we dat EUTHANASIE. Nog niet zo lang geleden is de zogenoemde Euthanasiewet aangenomen. Over de vraag of een arts het leven van een patiënt op diens verzoek zou mogen beëindigen bestaat echter nog altijd verschil van mening. Sommigen vinden dat euthanasie verboden zou moeten zijn. Anderen vinden dat een arts altijd euthanasie zou mogen toepassen als een patiënt daarom vraagt. Ten slotte zijn er ook mensen met een mening die daar tussenin ligt.

Stel: de mensen die vinden dat euthanasie verboden moet zijn staan aan het begin van de lijn (bij cijfer 1) en de mensen die vinden dat de arts altijd euthanasie mag toepassen als de patiënt daarom vraagt staan aan het einde van de lijn (bij cijfer 7). Waar zou u uzelf op de lijn plaatsen?

Showcard F4A/FPA presented, listing response alternatives

F	1.	1 forbid euthanasia	68	5.4	5.4
	2.	2	47	3.7	3.7
	3.	3	60	4.7	4.8
	4.	4	159	12.5	12.6

X0125 Income differences –position of respondent

Now I would like to discuss another problem with you. Some people think that the DIFFERENCES IN INCOME in our country should be increased (at number 1). Others think that these differences should be decreased (at number 7). Of course, there are also people whose opinion is somewhere in between. Where would you place yourself on this line?

Dan wil ik het nu met u over een ander probleem hebben. Sommige mensen vinden dat de VERSCHILLEN IN INKOMENS in ons land groter moeten worden (bij cijfer 1). Anderen vinden dat deze verschillen kleiner moeten worden (bij cijfer 7).

Natuurlijk zijn er ook mensen met een mening die hier ergens tussenin ligt.
Waar zou u uzelf op de lijn plaatsen?

Showcard F4B/P4B presented, listing response alternatives

X0126 Asylum seekers –position of CDA

Allowing ASYLUM SEEKERS to enter the Netherlands has been in the news frequently during the last few years. Some people think that the Netherlands should allow more asylum seekers to enter the country than the government currently does. Other people think that the Netherlands should send asylum seekers who are already staying here back to their country of origin. Of course, there are also people whose opinion lies somewhere in between.

At the beginning of this line are the people (and parties) who think that the Netherlands should allow more asylum seekers to enter (at number 1); at the end of the line are the people (and parties) who think that the Netherlands should send back as many asylum seekers as possible (at number 7).

I will ask you first to place some political parties on the line. If you have no idea at all which position a party has, then please feel free to say so.

Where would you place the CDA on this line?

De toelating van ASIELZOEKERS is de afgelopen jaren vaak in het nieuws geweest. Sommige mensen vinden dat Nederland meer asielzoekers zou moeten toelaten dan nu het geval is. Andere mensen vinden dat Nederland de asielzoekers die hier al zijn, zoveel mogelijk zou moeten terugsturen naar hun land van herkomst. Natuurlijk zijn er ook weer mensen met een mening die daar tussen in ligt.

Aan het begin van de lijn staan nu personen (en partijen) die vinden dat Nederland meer asielzoekers moet toelaten (dus bij cijfer 1); aan het einde van de lijn staan de personen (en partijen) die vinden dat Nederland zoveel mogelijk asielzoekers moet terugsturen (dus bij cijfer 7).

Ik ga u eerst vragen om politieke partijen te plaatsen op deze lijn. Als u helemaal niet weet welk standpunt een partij heeft, zeg het dan gerust.

Waar zou u het CDA op deze lijn plaatsen?

Parties were presented in random order

X0134 European unification –position of CDA

EUROPEAN UNIFICATION is well under way. The countries of the European Union have decided to work more and more closely together. However, not everybody holds the same view about it. Some people and parties think that European unification should go further. Others think that European unification has already gone too far. Suppose the people and parties who think that European unification should go further are at the beginning of this line (at number 1); and the people and parties who think European unification has already gone too far are at the end of the line (at number 7).

Where would you place the CDA on the line?

De EUROPESE EENWORDING is in volle gang. De landen van de Europese Unie hebben besloten om steeds nauwer met elkaar te gaan samenwerken. Maar niet iedereen denkt hierover hetzelfde. Sommige mensen en partijen vinden dat de Europese eenwording nog verder zou moeten gaan. Anderen vinden dat de Europese eenwording al te ver is gegaan. Stel dat de mensen en partijen die vinden dat de Europese eenwording nog verder zou moeten gaan aan het begin van de lijn staan (bij cijfer 1) en dat de mensen en partijen die vinden dat de eenwording al te ver is gegaan aan het einde van de lijn staan (bij cijfer 7).
Waar zou u het CDA op de lijn plaatsen?

X0142 Ethnic minorities –position of CDA

There is disagreement in the Netherlands about foreigners and ETHNIC MINORITIES. Some people and parties think that these people should be able to live in the Netherlands while preserving all customs of their own culture. Others think that these people, if they stay in the Netherlands, should fully adjust to Dutch culture. Of course, there are also people whose opinion is somewhere in between. At the beginning of this line are the people (and parties) who think that foreigners and ethnic minorities should be able to live in the Netherlands while preserving all customs of their own culture (at number 1); at the end of the line are the people (and parties) who think that these people should fully adjust themselves to Dutch culture (at number 7).

Where would you place the CDA on this line?

In Nederland wordt verschillend gedacht over allochtonen en ETNISCHE MINDERHEDEN. Sommige mensen en partijen vinden dat ze in Nederland moeten kunnen leven met behoud van alle gewoonten van de eigen cultuur. Anderen vinden dat zij zich, als zij in Nederland blijven, volledig moeten aanpassen aan de Nederlandse cultuur. Natuurlijk zijn er ook mensen die een mening hebben die daar tussen in ligt. Aan het begin van de lijn staan nu personen (en partijen) die vinden dat allochtonen en etnische minderheden in Nederland moeten kunnen leven met behoud van alle gewoonten van de eigen cultuur (dus bij cijfer 1); aan het einde van de lijn staan de personen (en partijen) die vinden dat ze zich volledig moeten aanpassen aan de Nederlandse cultuur (dus bij cijfer 7).

Waar zou u het CDA op deze lijn plaatsen?

X0150 Importance national anthem

Our country is continually changing. As a result of these changes, some things possibly disappear. Could you indicate how important or unimportant it is to you that certain things be preserved? You may choose between very important, important, unimportant, or very unimportant.

The national anthem.

In ons land vinden voortdurend veranderingen plaats. Mogelijk verdwijnen er, als gevolg van deze veranderingen, een aantal zaken. Kunt u aangeven hoe belangrijk of onbelangrijk u het vindt dat dergelijke zaken gehandhaafd blijven? U kunt steeds kiezen tussen zeer belangrijk, belangrijk, onbelangrijk of zeer onbelangrijk. Het volkslied.

X0158 Punishment of crimes

Now a few questions about punishment in the Netherlands. In general are crimes punished too harshly, too leniently, or just right in the Netherlands?

Nu enkele vragen over straffen in Nederland. Worden misdaden in Nederland over het algemeen te zwaar, te licht of juist goed bestraft?

P	1.	too harshly	5	0.4	0.4
	2.	just right	289	22.5	22.9
	3.	too leniently	969	75.3	76.7

			1287	100	100

X0159 Death penalty for certain crimes

And would you indicate whether you agree or disagree with the following statement? It might be good if the death penalty were reintroduced for certain crimes.

En wilt u voor de volgende uitspraak aangeven in hoeverre u het ermee eens of oneens bent?

Het zou misschien goed zijn als voor bepaalde misdaden de doodstraf weer zou worden ingevoerd.

X0161 Did vote for LPF in 2002?

As you may recall, the Lijst Pim Fortuyn (LPF) was the big winner at the parliamentary elections in 2002. With about one and a half million votes the party entered the Second Chamber with 26 seats, an enormous success. Were you one of the one and a half million people who voted for the LPF last year, or did you vote for another party?

Zoals u misschien nog wel weet, was de Lijst Pim Fortuyn (LPF) de grote winnaar bij de Kamerverkiezingen van 2002. Met ruim anderhalf miljoen stemmen kwam de partij in één keer met 26 zetels in de Tweede Kamer, een enorm succes. Was u een van die anderhalf miljoen mensen en heeft u verleden jaar op de LPF gestemd, of heeft u op een andere partij gestemd?

X0164 Sympathy score: CDA

There are many political parties in our country. I would like to know from you how sympathetic you find these parties. You can give each party a score between 0 and 100. The more sympathetic you find a party, the higher the score you give. A score of

50 means that you find a party neither sympathetic nor unsympathetic. If you don't know a party, please feel free to say so.
Which score would you give the CDA?

Er zijn veel politieke partijen in ons land. Ik zou graag van u weten hoe sympathiek u deze partijen vindt. U kunt iedere partij hiervoor punten geven tussen de 0 en de 100. Hoe sympathieker u een partij vindt, hoe meer punten u die partij geeft. 50 betekent dat u die partij niet sympathiek, maar ook niet onsympathiek vindt. Als u een partij niet kent, zegt u het dan gerust.
Hoeveel punten zou u het CDA geven?

Parties were presented in random order

Showcard F6/P6 presented, listing a horizontal line with ten labels at equal distance, 0 . . . 100. Position 0 is additionally labeled as 'very unsympathetic', position 50 as 'neither sympathetic nor unsympathetic', and position 100 as 'very sympathetic'.

X0173 Sympathy score: Jan Peter Balkenende

I would also like to know how sympathetic you find the following politicians. If you don't know a politician, please feel free to say so.

First Jan Peter Balkenende. Which score would you give him?

Ik zou ook graag van u weten hoe sympathiek u de volgende politici vindt. Als u een politicus niet kent, zegt u dat dan gerust.

Allereerst nemen we Jan Peter Balkenende. Hoeveel punten zou u hem geven?

Politicians were presented in random order

X0184 Read campaign news in newspaper

Now I would like to ask you some questions about the campaign preceding the election of the Second Chamber on January 22. If there was news about the election campaign in the newspaper, how often did you read such news?

Dan volgen nu enkele vragen over de verkiezingscampagne en de Kamerverkiezingen van 22 januari 2003. Als er in de krant nieuws over de verkiezingscampagne stond, hoe vaak las u dat dan?

X0227 Importance supervision voting in general

When you cast your vote at an election, the officials at the polling station insure that you can do so undisturbed and completely by yourself. It would also be possible to place voting machines in publicly accessible areas such as stations, post offices, shopping centres, or even on the street, but without officials who continually supervise the site. Some people think that supervision is not that important, whereas others consider this to be very important. What do you think? Could you indicate how important supervision is for you in such a situation?

Als u bij de verkiezingen uw stem uitbrengt, zorgen de leden van het stembureau ervoor dat u dat ongestoord en helemaal zelf kunt doen. Het is ook mogelijk om stemmachines te plaatsen in openbaar toegankelijke ruimten zoals stations, postkantoren, en winkelcentra, of zelfs op straat, zonder dat leden van een stembureau steeds toezicht houden. Sommige mensen vinden toezicht niet zo belangrijk, terwijl anderen toezicht juist wel belangrijk vinden. Wat vindt u? Kunt u aangeven hoe zwaar voor u in zo'n situatie toezicht zou wegen?

Showcard F8 presented, listing response alternatives

X0234 Support for first person on the list or for the party

In the Netherlands a vote for the first candidate on the list is a vote both for the candidate and for the party as a whole. You voted for the first candidate of (party mentioned in X0196). Did you do so specifically to support this candidate or in order to support the (party mentioned in X0196)?

Een stem op de lijsttrekker is in Nederland zowel een stem op de persoon van de eerstvermelde kandidaat als een stem op de betreffende partij als zodanig. U hebt

gestemd op de lijsttrekker van (partij genoemd bij X0196). Ging het er u vooral om om steun te geven aan de lijsttrekker of om steun te geven aan (partij genoemd bij X0196)?

Routing, if X0231 code 1

F	1.	specifically support first person	188	14.8	21.2
	2.	specifically support party as a whole	697	54.8	78.8
	3.	DK	6	0.5	MD
		INAP	380	29.9	MD
			1271	100	100
P	1.	specifically support first person	232	18.0	24.6
	2.	specifically support party as a whole	710	55.2	75.4
	3.	DK	6	0.5	MD
		INAP	339	26.3	MD
			1287	100	100

X0235 Voting behavior if candidate was placed lower on the party list

SUPPOSE that (candidate of party mentioned in X0196) had NOT been the first on the list, but was lower on the list. Would you still have voted for this person, or would you have voted for the person who was THEN the first on the party list?

STEL dat de (lijsttrekker van partij genoemd bij X0196) NIET als eerste op de kandidatenlijst stond, maar op een lagere plaats. Zou u ook in dat geval op deze persoon hebben gestemd, of zou u hebben gestemd op de persoon die DAN als eerste op de lijst zou staan?

Routing, if X0231 code 1

F	1.	still vote for this person	253	19.9	30.5
	2.	vote for the new first candidate	576	45.3	69.5

X0320 The Prime Minister should be directly elected by the voters

I will read you a few statements. Would you indicate with the help of this showcard to what degree you are in agreement with each of the statements?

The Prime Minister should be directly elected by the voters.

Ik lees u nu enkele beweringen voor. Wilt u mij aan de hand van dit toonblad zeggen in hoeverre u het met elke bewering eens bent?

De minister-president moet rechtstreeks door de kiezers worden gekozen.

X0369 Coalition preference 2003 (post election)

Refer to 4.3.4 for construction of this variable.

X0370 Faith in Jan Peter Balkenende as Prime Minister

I will now mention the names of possible candidates for the position of Prime Minister, one at a time. Could you indicate how much faith you would have in each person as Prime Minister? How much faith do you have in Jan Peter Balkenende as Prime Minister? Please mention the number that applies to the candidate. If you do not know a candidate, please do not hesitate to say so.

Ik noem nu telkens de naam van een mogelijke kandidaat voor de post van minister-president. Wilt u aangeven hoeveel vertrouwen u in deze persoon zou hebben als minister-president? Hoeveel vertrouwen heeft u in Jan Peter Balkenende als minister-president? Noemt u maar het cijfer dat van toepassing is. Als u een kandidaat niet kent, zegt u het dan gerust.

X0374 Left-right self-rating

It is often said of political beliefs that they are LEFT OR RIGHT. When you think of your own political beliefs, where would you place yourself on this line? Please tell the number that applies to you.

Van politieke opvattingen wordt vaak gezegd dat zij LINKS OF RECHTS zijn. Wanneer u denkt aan uw eigen politieke opvattingen, waar zou u dan zichzelf op

deze lijn plaatsen? Noemt u maar het cijfer dat op u van toepassing is.

X0401 Different opinions of right and wrong

I will now read two statements. Would you indicate for each statement to what extent you agree or disagree?

There are so many opinions about what is right and what is wrong that you sometimes do not really know what to think.

Er volgen nu weer twee uitspraken. Wilt u voor elke uitspraak aangeven in welke mate u het daarmee eens of oneens bent?

Er zijn zoveel verschillende opvattingen over wat goed en wat verkeerd is dat je soms niet meer weet waar je aan toe bent.

X0402 Things change so rapidly that one can't be sure about what is right and wrong

Things change so rapidly these days that one can't be sure about what is right and what is wrong.

Alles verandert hedentendage zo snel dat men vaak nauwelijks meer weet wat goed en wat slecht is.

X0403 Respondent feels lonely

Do you sometimes feel lonely? Do you sometimes have the feeling that in the end you are alone in the world and must tackle things alone?

Voelt u zich soms eenzaam? Heeft u soms het gevoel dat u uiteindelijk toch alleen staat in de wereld en alleen de zaken moet opknappen?

X0404 Probability of future vote for CDA

Some people are completely certain that they will always vote for the same party. Others reconsider each time to which party they will give their vote. I will mention a number of parties. Would you indicate for each party how probable it is that you will ever vote for that party? Tell me the number that applies to the party. If you do not know a party or if you do not know the answer, do not hesitate to say so and we will continue with the next party. The CDA?

Voor sommigen is het heel zeker dat zij altijd op dezelfde partij zullen stemmen. Anderen bekijken elke keer opnieuw aan welke partij zij hun stem geven. Ik noem u een aantal partijen. Wilt u voor elke partij aangeven hoe waarschijnlijk het is dat u er ooit op zult stemmen? Noemt u maar het cijfer dat van toepassing is. Als u een partij niet kent of het niet weet, zeg het gerust, we gaan dan verder met de volgende partij. Het CDA?

X0417	Effect: Contact member of municipal council				
	On this showcard are various possibilities of what you could do if you were completely opposed to plans put forward by the LOCAL GOVERNING AUTHORITIES.				

Would you indicate for each of these possibilities if you think that a lot, little, or nothing could be achieved? Please mention each time a letter on the showcard first.
a. Contact a member of the municipal council.

Op deze kaart staan verschillende mogelijkheden van wat u zou kunnen doen als u het helemaal niet eens bent met plannen van het GEMEENTEBESTUUR.
Wilt u mij voor elk van deze mogelijkheden zeggen of u daar veel, weinig of niets mee denkt te bereiken? Noemt u telkens maar een letter van de kaart.
a. Contact opnemen met een lid van de gemeenteraad.

X0430 Approve of obstructing government by demonstration or mass meetings
 There are various ways in which people can express their indignation about or opposition to decisions or measures, for example of the national government. I will mention a few. Would you indicate whether you approve of such methods or not?
 Suppose that someone finds a law so unjust that he decides to hinder the work of the government through sit-ins, mass meetings or protest marches.
 Do you approve of this or disapprove?

Er zijn verschillende manieren waarop mensen hun verontwaardiging of afkeuring over beslissingen en maatregelen, bijvoorbeeld van de regering, kunnen uiten. Ik zal er een paar noemen. Wilt u aangeven of u ze goedkeurt of niet?
 Stel dat iemand een wet zo onrechtvaardig vindt dat hij besluit de regering bij zijn werk te hinderen door zitdemonstraties, massabijeenkomsten of protestoptochten.
 Keurt u dat goed of keurt u dat af?

F	1. approve	660	51.9	52.9
	2. disapprove	486	38.2	38.9
	3. don't care	102	8.0	8.2
	4. DK	23	1.8	MD
		1271	100	100

X0431 Approve of the police arresting participants of demonstration
 The police arrest a number of participants in these sit-ins, mass meetings, or protest marches. Do you approve of this or disapprove?
 De politie arresteert een aantal deelnemers van deze zitdemonstraties, massabijeenkomsten of protestoptochten. Keurt u dat goed of keurt u dat af?

F	1. approve	595	46.8	50.3
	2. disapprove	521	41.0	44.0

3.	don't care	67	5.3	5.7
4.	DK	86	6.8	MD
5.	NA	2	0.2	MD
		1271	100	100

X0432 I believe in strictly upholding the law, no matter the consequences

To what degree are you in agreement or disagreement with the following statement?
I am a supporter of strict enforcement of the law, no matter the consequences.

In hoeverre bent u het met de volgende uitspraak eens of oneens?

Ik ben een voorstander van strikte handhaving van de wet, welke gevolgen dat ook mag hebben.

Showcard F15 used, listing response alternatives

F	1.	fully agree	178	14.0	14.2
	2.	agree	579	45.6	46.2

X0433 You should obey a law you don't agree with

If there is a law that one does NOT agree with, there are various ways that one can react to such a law. Would you indicate for each of the following possibilities if you are in agreement or disagreement?

You should obey a law even if you are not in agreement with it.

Als er een wet is, waar men het NIET mee eens is, kan men zich op verschillende manieren opstellen tegenover zo'n wet. Wilt u mij voor ieder van de volgende mogelijkheden zeggen of u het daarmee eens of oneens bent?

Een wet waar je het niet mee eens bent moet je toch nakomen.

Showcard F15 used, listing response alternatives

F	1.	fully agree	169	13.3	13.5

4.	fully disagree	461	36.3	37.0
5.	DK	25	2.0	MD
		1271	100	100

X0438 Strength of government action against disturbance

Do you feel that the government should react more strongly against breaches of the peace, should be more flexible, or do you feel that things are fine the way such things now are handled.

Vindt u dat de overheid krachtiger tegen ordeverstoringen moet optreden, soepeler moet optreden of vindt u het goed, zoals het nu gebeurt?

F	1.	react more strongly	956	75.2	76.7
	2.	be more flexible	25	2.0	2.0
	3.	good as it is	266	20.9	21.3
	4.	DK	24	1.9	MD
			1271	100	100

X0439 Punishment of crimes

Now a few questions about punishment in the Netherlands.

Are crimes in the Netherlands generally punished too harshly, too leniently, or is it good as it is?

Nu enkele vragen over straffen in Nederland.

Worden misdaden in Nederland over het algemeen te zwaar, te licht of juist goed bestraft?

F	1.	too harshly	8	0.6	0.6
	2.	good as it is	237	18.6	19.0
	3.	too leniently	1005	79.1	80.4
	4.	no opiniom	21	1.7	MD
		1271	100	100	

X0440 Death penalty for certain crimes

And would you indicate to what extent you are in agreement or disagreement with the following statement?

It would perhaps be a good idea if the death penalty were introduced as punishment in certain cases.

En wilt u voor de volgende uitspraak zeggen in hoeverre u het ermee eens of oneens bent?

Het zou misschien goed zijn als voor bepaalde misdaden de doodstraf weer zou worden ingevoerd.

Showcard F5 used, listing response alternatives

F	1.	fully agree	81	6.4	6.4
	2.	agree	199	15.7	15.8
	3.	neither agree nor disagree	104	8.2	8.2

4.	disagree	347	27.3	27.5
5.	fully disagree	531	41.8	42.0
6.	no opinion	9	0.7	MD
		1271	100	100

X0441 Religion good guide in politics

Do you fully agree, agree, disagree or fully disagree with the following statement?
Religion is a good guide in politics.

Bent u het met de volgende uitspraak helemaal eens, mee eens, mee oneens of
helemaal mee oneens?

Het geloof is voor de politiek een goede wegwijzer.

F	1.	fully agree	79	6.2	6.3
	2.	agree	329	25.9	26.3
	3.	disagree	555	43.7	44.4

X0461 Number of household members

Now I would like to ask you some questions about yourself, your household and the members of your family. Including yourself, how many persons make up your household? (Children who are living elsewhere are not considered as members of the household.)

Dan zou ik u nu wat vragen willen stellen met betrekking tot uzelf, uw huishouden en uw familieleden. Het gaat om alle personen die in deze huishouding wonen, dus ook eventueel inwonende personen. Uzelf meegerekend, uit hoeveel personen bestaat het huishouden waartoe u behoort? (Kinderen die elders op kamers wonen niet tot het huishouden rekenen.)

X0545 Total net income per household

On this showcard are some income groups. These relate to the total net income of all members of the household together for a year, after taxes and such. Extra earnings or income from children living at home must be included: child payments, social and welfare payments, old age benefits and pensions also count as income. Could you indicate what the total net income of your household is?

This question is very important for this research. NIPO can guarantee you that this information will be kept STRICTLY CONFIDENTIAL. However, for scientific research, in which the information of individuals is combined into groups, the responses to this question are extremely important.

Op dit toonblad staan enige inkomensgroepen. Het gaat hier om het totale netto inkomen van alle gezinsleden bij elkaar per jaar, na aftrek van belastingen en dergelijke. Eventuele bijverdiensten en de inkomsten van meeverdienende kinderen moet u dus meetellen; kinderbijslag, sociale uitkeringen, AOW en pensioen gelden ook als inkomen. Kunt u aangeven in welke categorie het jaarlijkse inkomen van uw huishouden valt?

Deze vraag is voor het onderzoek erg belangrijk. Het NIPO kan u verzekeren dat dit gegeven natuurlijk STRIKT GEHEIM blijft. Maar voor wetenschappelijke verwerking van de gegevens van alle ondervraagden bij elkaar, is het voor dit onderzoek een uitermate belangrijk gegeven.

6. Additional information

6.1 Dutch Politicians

The data file and the code-book contain several variables that are based on references to one or more Dutch politicians. This section provides a brief description of these politicians in terms of their function (at the time of the election) and partisan affiliation. The politicians are ranked alphabetically.

<i>Name</i>	<i>Description of politician</i>
Balkenende	Jan Peter Balkenende, floor leader in the Second Chamber before the elections of 2002, party leader of the CDA and Prime Minister in the first and second Balkenende Cabinet.
Bomhoff	Eduard Bomhoff, minister of Health, Welfare and Sports in the first Balkenende Cabinet on behalf of the LPF.
Bos	Wouter Bos, floor leader in the Second Chamber before the elections of 2003 and party leader of the PvdA.
Cohen	Job Cohen, Mayor of Amsterdam, presented as candidate for the function of Prime Minister in the elections of 2003 on behalf of the PvdA.
Dijkstal	Hans Dijkstal, floor leader in the Second Chamber and first candidate on the list of the VVD at the elections of 2002.
Dittrich	Boris Dittrich, member of the Second Chamber on behalf of D66.
Fortuyn	Pim Fortuyn, founder of the LPF and first candidate and party leader of that party; Fortuyn was murdered on 6 May 2002, nine days before the 2002 parliamentary elections.
de Graaf	Thom de Graaf, floor leader and first candidate on the list of D66 in the elections of 2002 and 2003.
Halsema	Femke Halsema, floor leader and first candidate on the list of GroenLinks in the elections of 2003.
Heinsbroek	Herman Heinsbroek, minister of Economic Affairs in the first Balkenende Cabinet on behalf of the LPF.
Herben	Mat Herben, candidate on the list of the LPF in 2002 and first candidate on the list in 2003.
Jorritsma	Annemarie Jorritsma, Minister of Economic Affairs in the second Kok Cabinet on behalf of the VVD.
Kok	Wim Kok, Prime Minister in the first and second Kok Cabinet on behalf of the PvdA.
Marijnissen	Jan Marijnissen, first candidate and party leader of the SP in the elections of 2002 and 2003.
Melkert	Ad Melkert, floor leader in the Second Chamber and first candidate on the list of the PvdA at the elections of 2002.
Netelenbos	Tineke Netelenbos, Minister of Transport and Communications in the second Kok Cabinet on behalf of the PvdA.
van Nieuwenhoven	Jeltje van Nieuwenhoven, chairman of the Second Chamber in 2002, candidate on the list of the PvdA.
Rosenmöller	Paul Rosenmöller, floor leader in the Second Chamber and first candidate on the list of GroenLinks at the elections of 2002.
Rouvoet	André Rouvoet, floor leader in the Second Chamber and first candidate on the list of the ChristenUnie at the elections of 2003.
Teeven	Fred Teeven, floor leader in the Second Chamber and first candidate on the list of Leefbaar Nederland at the elections of 2002.
Veling	Kars Veling, floor leader in the Second Chamber and first candidate on the list of the ChristenUnie at the elections of 2002.
van der Vlies	Bas van der Vlies, floor leader in the Second Chamber and first candidate on the list of the SGP at the elections of 2002 and 2003.
Zalm	Gerrit Zalm, floor leader in the Second Chamber and first candidate on the list of the VVD at the elections of 2003.

6.2 Outcome of the 2002 and 2003 parliamentary elections

This paragraph contains a brief description of the outcome of the 2002 and 2003 parliamentary elections. There are various publications with more detailed information about these elections. For information on the 2002 and 2003 parliamentary elections see, for example, the Spring (special) issue of *Acta Politica* (*Acta Politica*, 2003, volume 38, number 1).

The numbers of the official election outcome are received from Statistics Netherlands (www.cbs.nl).

The official outcome of the May 2002 parliamentary elections in terms of the numbers of valid votes, invalid votes and abstentions is as follows:

Number of valid votes	9,501,152	78.9 %
Number of invalid votes	15,074	0.1 %
Number of abstentions	2,520,709	20.9 %
Total number of eligible citizens	12,035,935	100.0 %

The valid votes in the 2002 parliamentary elections were distributed over 16 parties as follows. The acronyms of the parties are explained end the end of this paragraph.

<i>party</i>	<i>absolute number of votes</i>	<i>percentage of popular vote</i>	<i>number of seats</i>
CDA	2,653,723	27.9	43
CU	240,953	2.5	4
D66	484,317	5.1	7
DN	9,058	0.1	-
GL	660,692	7.0	10
LN	153,055	1.6	2
LPF	1,614,801	17.0	26
NMP	2,305	0.0	-
PvdA	1,436,023	15.1	23
PvdT	6,393	0.1	-
RvP	63	0.0	-
SGP	163,562	1.7	2
SP	560,447	5.9	9
VIP/OU	100,333	0.1	-
VSP	39,005	0.4	-
VVD	1,466,722	15.4	24

The official outcome of the 2003 parliamentary elections in terms of the numbers of valid votes, invalid votes and abstentions is as follows:

Number of valid votes	9,654,475	79.9 %
Number of invalid votes	12,127	0.1 %
Number of abstentions	2,410,109	20.0 %
Total number of eligible citizens	12,076,711	100.0 %

The valid votes in the 2003 parliamentary elections were distributed over 19 parties as follows. The acronyms of the parties are explained end the end of this paragraph.

<i>party</i>	<i>absolute number of votes</i>	<i>percentage of popular vote</i>	<i>number of seats</i>
AVD	990	0.0	-
CDA	2,763,480	28.6	44
CU	204,694	2.1	3
D66	393,333	4.1	6
DC.NL	2,521	0.0	-
DN	7,271	0.1	-
GL	495,802	5.1	8
LN	38,894	0.4	-

LPF	549,975	5.7	8
LV	296	0.0	-
NCPN	4,854	0.1	-
PvdA	2,631,363	27.3	42
PvdT	13,845	0.1	-
PvdD	47,754	0.5	-
Ratelband	9,045	0.1	-
SGP	150,305	1.6	2
SP	609,723	6.3	9
VIP	1,623	0.0	-
VVD	1,728,707	17.9	28

Explanation of acronyms (in alphabetical order):

AVD	Alliantie Vernieuwing en Democratie
CDA	Christen Democratisch Appèl
CU	ChristenUnie
D66	Democraten 66
DC.NL	De Conservatieven.nl
DN	Duurzaam Nederland
GL	GroenLinks
LN	Leefbaar Nederland
LPF	Lijst Pim Fortuyn
LV	Lijst Veldhoen
NCPN	Nieuwe Communistische Partij Nederland
NMP	Nieuwe Midden Partij

SP	Socialistische Partij
VIP	Vooruitstrevende Integratie Partij
VIP/OU	Vrije Indische Partij/OuderenUnie
VSP	Verenigde Senioren Partij
VVD	Voor Vrijheid en Democratie

6.3 Comparability of questions with previous election studies

This paragraph contains an overview of the questions asked in previous Dutch Parliamentary Election Studies that are comparable to the questions asked in the 2002 and 2003 study.

A complete view of the comparability of questions can not, however, be provided without detailed inspection of the questionnaires (for example taken in account the order of the questions) and with a clearly defined research objective in mind. This section provides a *general* overview of the questions that may be comparable on the basis of (almost) identical question wording. Starting point are the 2002 and 2003 election studies. For a more detailed view of the comparability of questions since 1971 we refer to the codebook of the 1998 DPES, where one can find the comparability of all questions ever asked.

In the first column of the table English labels are presented. In the second column the wave and question numbers of the 2002 election study are presented, in the third column those of 2003. The fourth column contains the years, wave and question numbers the variable of 2002 or 2003 can be compared with.

variable label	DPES 2002	DPES 2003	other Dutch Parliamentary Election Studies (year/wave/question number)
reads about national news	I/20	20	1998/I/2, 1994/I/2, 1994/III/2, 1989/I/2, 1989/III/2, 1986/I/1, 1986/III/1, 1982/I/1, 1982/IV/1, 1981/I/1, 1981/II/1, 1981/III/1, 1981/V/1, 1977/I/3, 1972/I/22, 1971/I/21, 1971/V/14
talks about national news	I/30	30	1998/I/3, 1994/I/3, 1994/III/3, 1989/I/3, 1989/III/3, 1986/I/2, 1986/III/2, 1982/I/2, 1982/IV/2, 1981/I/2, 1981/II/2, 1981/III/2, 1981/V/2, 1977/I/4, 1972/I/21, 1971/I/28, 1971/V/13
